HISTORICAL STATISTICS OF NEWFOUNDLAND AND LABRADOR

Published under the Authority of
The Honourable Eric S. Jones,
Minister of Finance.

Prepared by the Economics and Statistics
Division, Department of Finance,
Government of Newfoundland and Labrador.

Printed by Creative Printers & Publishers Limited
Office of the Queen's Printer
St. John's, Newfoundland.

October 1970 Volume I (1)

This cover symbol was designed to try to convey, in abstract form, the feeling of growth or expansion in the various sectors of the economy of our Province.

FOREWORD

By The Honourable Joseph R. Smallwood
Premier of Newfoundland and Labrador

I have felt for many years that a book of statistics concerning our Province would be most valuable and that it was urgently needed. The task of assembling this volume of "Historical Statistics of Newfoundland and Labrador" has not been without difficulties and frustrations for those engaged in the assignment. However, their efforts will not only aid in providing a ready source of reliable information to the more inquisitive general public, but will prove to be a time saving blessing to serious research workers. I should like, therefore, to express my sincere appreciation to Mr. Gary Brenton, who coordinated the preparation of this volume, as well as Mr. Cyril Abery, Mr. Paul Craniford, Mr. David Mercer, Mr. Peter Poder and the other staff of the Economics and Statistics Division of the Department of Finance who participated in the project.

Joseph R. Smallwood

PREFACE

It has been evident for a number of years that a publication containing detailed statistical information on Newfoundland and Labrador was urgently required. This need has been expressed repeatedly by various royal commissions, by numerous departments and agencies of all levels of government, by consultants and researchers and by the general public. The publication of this volume of statistics will help to alleviate the necessity of referring to numerous sources for required data.

This original publication is designed to be a foundation document. It is intended to release annual supplements updating the data presented in each of the tables contained in this volume and adding newly developed statistical series. The supplementary volumes will be much less comprehensive in terms of the period covered and they will not contain the elaborate explanatory notes supplied in this issue. However, it is hoped that the issuance of annual supplements will provide a means of maintaining a comprehensive collection of up-to-date statistical information for Newfoundland and Labrador.

The material selected for inclusion in this volume has been assembled for presentation in 23 sections. Each section contains a brief introduction which provides the source of the data for each table, as well as definitions, explanations and comments relating to the statistics. In each section the introduction is followed immediately by the statistical tables.

Much of the data contained in this original issue was obtained from publications which have been prepared and released by the Dominion Bureau of Statistics. A limited amount of published and unpublished material was also obtained from Federal and Provincial Government departments and agencies. In addition, some previously unpublished statistical information was acquired from various divisions of the Dominion Bureau of Statistics.

In assembling this statistical volume no attempt was made to confine the search for information to any particular period of time. Indeed, efforts were made to go back as far as possible in constructing time series. However, in many cases these efforts were limited by changing statistical concepts and classifications, data inconsistencies and a lack of reliable source material. Much of the information presented will be found useful by persons engaged in planning and performing social and economic studies. Therefore, wherever possible, time series have been presented both in seasonally adjusted and unadjusted forms to facilitate economic analysis and forecasting.

Nevertheless, it is extremely difficult to design a useful information guide without knowing the full interests and needs of those who will ultimately use the material presented. For this reason a "mail back" information card has been included at the back of this volume. It is designed to aid in improving the usefulness of the series presented in subsequent publications by permitting adjustment to be made in the subjects presented in response to reader reaction and need. All suggestions, criticisms and corrections will be appreciated.

LIST OF SYMBOLS

The following symbols and abbreviations are used in this publication:

D.B.S. = Dominion Bureau of Statistics.

. . = figures not available.

. . . = figures not appropriate or not applicable.

– = nil or zero.

X = confidential.

S.I.C. Code = Standard Industrial Classification Code.

n.e.s. = not elsewhere specified.

p = preliminary figures.

r = revised figures.

LIST OF TABLES

Table Page

A-1. Number and Average Annual Compound Growth Rate of Population, Newfoundland and Labrador, For Selected Years 1836 to 1969 6

A-2. Births, Deaths, Marriages, Net Natural Increase, and Rates per Thousand Population, Newfoundland and Labrador, 1936 to 1968 7

A-3. Number and Percent of Population, Newfoundland and Labrador, By Sex, For Selected Years 1901 to 1969 8

A-4. Number and Percent of Population, Newfoundland and Labrador, By Age Group, For Selected Years 1935 to 1969 8

A-5. Number and Percent of Male Population, Newfoundland and Labrador, By Age Group, For Selected Years 1935 to 1969 9

A-6. Number and Percent of Female Population, Newfoundland and Labrador, By Age Group, For Selected Years 1935 to 1969 9

A-7. Number and Percent of Population, Newfoundland and Labrador, By Marital Status, For Census Years 1901 to 1966 10

A-8. Population, Newfoundland and Labrador, By Religious Denomination, For Selected Years 1857 to 1961 10

A-9. Number and Percent of Population, Newfoundland and Labrador, By Ethnic Origin, 1945, 1951 and 1961 11

A-10. Population, Newfoundland and Labrador, By Census Division and Sex, 1951, 1956, 1961 and 1966 11

A-11. Urban, Rural, Rural Farm and Rural Non-Farm Population, Newfoundland and Labrador, By Census Division, 1951, 1956, 1961 and 1966 12

A-12. Population of Newfoundland and Labrador, By Federal Electoral District, 1951, 1956, 1961 and 1966 13

A-13. Households, Newfoundland and Labrador, By Type and Number of Persons per Household, 1966 13

A-14. Households, St. John's, By Type and Number of Persons per Household, 1966 14

A-15. Number of Families of Incorporated Cities, Towns and Villages of 1,000 Population and Over, Newfoundland and Labrador, By Number of Persons, 1966 15

A-16. Number of Families of Incorporated Cities, Towns and Villages of 1,000 Population and Over, Newfoundland and Labrador, By Number of Children, 1966 16

A-17. Available Historical Population Statistics, Newfoundland and Labrador, By Settlement, For Census Years 1901 to 1966 17

A-18. Population, Corner Brook and St. John's, By Specified Age Groups, 1951, 1956, 1961 and 1966 17

A-19. Population of Municipalities Incorporated as at June 1, 1966, Newfoundland and Labrador, For Census Years 1951, 1956, 1961 and 1966 18

B-1. Number of Doctors and Registered Nurses per 1,000 Population, Newfoundland and Labrador, 1949 to 1968 27

B-2. Selected Statistics of Operating Hospitals, Newfoundland and Labrador, 1953 to 1968 28

B-3. Number of Operating Hospitals, Newfoundland and Labrador, By Type and Rated Bed Capacity, 1967 and 1968 28

B-4. Number and Rate of Deaths From Cancer and Tuberculosis, Newfoundland and Labrador, 1950 to 1968 29

B-5. Number of Individuals and Heads of Families Receiving Social Assistance, Newfoundland and Labrador, By Type, 1951 to 1969 30

B-6. Selected Statistics of Social Assistance, Newfoundland and Labrador, By Provincial Electoral District, March 1968 31

B-7. Number of Months During Which Individuals and Heads of Families Received Social Assistance in Kind, Newfoundland and Labrador, Fiscal Years 1962-63 to 1967-68 32

B-8. Family Allowance Payments, Newfoundland and Labrador, Fiscal Years 1951-52 to 1967-68 32

B-9. Number of Children in Institutions and Foster Homes, and Adoptions Placed or Recognized, Newfoundland and Labrador, Fiscal Years 1950-51 to 1967-68 33

B-10. Selected Statistics of Admissions to Boys Home and Training School, Newfoundland and Labrador, Fiscal Years 1953-54 to 1967-68 33

C-1. Total Population 14 Years of Age and Over, Participation Rate, Labour Force, Employed, Unemployed, Unemployment Rate, Newfoundland and Labrador, 1949 to 1969 41

C-2. Male Population 14 Years of Age and Over, Participation Rate, Labour Force, Employed, Unemployed, Newfoundland and Labrador, 1949 to 1969 42

C-3. Female Population 14 Years of Age and Over, Participation Rate, Labour Force, Employed, Unemployed, Newfoundland and Labrador, 1949 to 1969 43

C-4. Labour Force, Newfoundland and Labrador, By Age Group and Sex, 1951 and 1961 45

C-5. Labour Force, Newfoundland and Labrador, By Occupation Group and Educational Level, 1961 46

C-6. Labour Force, Newfoundland and Labrador, By Industry and Class of Worker, 1961 47

Table Page

C-7. Total Labour Force, 15 Years of Age and Over, Newfoundland and Labrador, By Industry Divisions, Showing Occupation Divisions and Selected Occupations, 1951 and 1961 49

C-8. Male Labour Force, 15 Years of Age and Over, Newfoundland and Labrador, By Industry Divisions, Showing Occupation Divisions and Selected Occupations, 1951 and 1961 52

C-9. Female Labour Force, 15 Years of Age and Over, Newfoundland and Labrador, By Industry Divisions, Showing Occupation Divisions and Selected Occupations, 1951 and 1961 55

C-10. Labour Force, Adjusted For Seasonal Variation, Newfoundland and Labrador By Month, 1953 to 1970 58

C-11. Labour Force, Unadjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1953 to 1970 59

C-12. Employed, Adjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1953 to 1970 59

C-13. Employed, Unadjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1953 to 1970 60

C-14. Unemployed, Adjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1953 to 1970 60

C-15. Unemployed, Unadjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1953 to 1970 61

C-16. Unemployment Rate, Adjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1953 to 1970 61

C-17. Unemployment Rate, Unadjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1953 to 1970 62

C-18. Estimates of Employees, Forestry, Newfoundland and Labrador, By Month, 1961 to 1969 62

C-19. Estimates of Employees, Mining, Newfoundland and Labrador, By Month, 1961 to 1969 63

C-20. Estimates of Employees, Manufacturing, Newfoundland and Labrador, By Month, 1961 to 1969 63

C-21. Estimates of Employees, Construction, Newfoundland and Labrador, By Month, 1961 to 1969 64

C-22. Estimates of Employees, Transportation, Communication and Other Utilities, Newfoundland and Labrador, By Month, 1961 to 1969 64

C-23. Estimates of Employees, Trade (Wholesale and Retail), Newfoundland and Labrador, By Month, 1961 to 1969 65

C-24. Estimates of Employees, Finance, Insurance and Real Estate, Newfoundland and Labrador, By Month, 1961 to 1969 65

C-25. Estimates of Employees, Community, Business, and Personal Services, Newfoundland and Labrador, By Month, 1961 to 1969 66

C-26. Estimates of Employees, Public Administration, Newfoundland and Labrador, By Month, 1961 to 1969 66

C-27. Labour Force, 15 Years of Age and Over, For Incorporated Cities, Towns and Villages of 1,000 Population and Over, Newfoundland and Labrador, By Occupation Division, 1961 67

D-1. Wages and Salaries, Adjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1951 to 1969 76

D-2. Wages and Salaries, Unadjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1951 to 1969 77

D-3. Average Weekly Wages and Salaries, Forestry, Newfoundland and Labrador, By Month, 1957 to 1969 77

D-4. Average Weekly Wages and Salaries, Mining (Including Milling), Newfoundland and Labrador, By Month, 1957 to 1969 78

D-5. Average Weekly Wages and Salaries, Manufacturing, Newfoundland and Labrador, By Month, 1957 to 1969 78

D-6. Average Weekly Wages and Salaries, Construction, Newfoundland and Labrador, By Month, 1957 to 1969 79

D-7. Average Weekly Wages and Salaries, Transportation, Communication, and Other Utilities, Newfoundland and Labrador, By Month, 1957 to 1969 79

D-8. Average Weekly Wages and Salaries, Trade (Wholesale and Retail), Newfoundland and Labrador, By Month, 1957 to 1969 80

D-9. Average Weekly Wages and Salaries, Industrial Composite, Newfoundland and Labrador, By Month, 1957 to 1969 80

D-10. Average Weekly Wages and Salaries, Industrial Composite, Corner Brook and St. John's, By Month, 1957 to 1969 81

D-11. Average Hourly Earnings of Hourly-rated Wage-earners, Mining (Including Milling), Newfoundland and Labrador, By Month, 1957 to 1969 82

D-12. Average Hourly Earnings of Hourly-rated Wage-earners, Manufacturing, Newfoundland and Labrador, By Month, 1957 to 1969 82

D-13. Average Hourly Earnings of Hourly-rated Wage-earners, Construction, Newfoundland and Labrador, By Month, 1957 to 1969 83

D-14. Average Weekly Hours of Hourly-rated Wage-earners, Mining (Including Milling), Newfoundland and Labrador, By Month, 1957 to 1969 83

D-15. Average Weekly Hours of Hourly-rated Wage-earners, Manufacturing, Newfoundland and Labrador, By Month, 1957 to 1969 84

SECTION A

POPULATION AND VITAL STATISTICS

SECTION A

POPULATION AND VITAL STATISTICS

A- 1. **Number and Average Annual Compound Growth Rate of Population, Newfoundland and Labrador, For Selected Years 1836 to 1969**

Source: D.B.S. **Province of Newfoundland, Statistical Background, 1949,** p. 4, (table 4); D.B.S. **Census of Canada, 1961,** 92-542, (table 20); **1966,** 92-610, (table 19); D.B.S. **Population 1921-1966, Revised Annual Estimates of Population By Sex and Age, Canada and the Provinces,** 91-511; D.B.S. **Estimated Population By Sex and Age Group, For Canada and Provinces,** 91-202, 1967, 1968, 1969.

Definitions and Explanations:

During the period from 1836 to 1945 the Newfoundland Government conducted eleven censuses. Since 1949 the Dominion Bureau Of Statistics conducted four censuses in Newfoundland and Labrador, and have prepared population estimates for the intercensal years .

A- 2. **Births, Deaths, Marriages, Net Natural Increase and Rates Per Thousand Population, Newfoundland and Labrador, 1936 to 1968**

Source: D.B.S. **Vital Statistics, 1967,** 84-202, p. 69, (table B1), p. 96, (table D1), p. 203, (table M1), p. 45, (table S5); D.B.S. **Vital Statistics, Preliminary Annual Report, 1967,** 84-201, p. 7, (table 3); Data for 1968 supplied by Vital Statistics Division, Department of Health, Government of Newfoundland and Labrador.

Definitions and Explanations:

Net natural increase is calculated by subtracting births from deaths.

A- 3. **Number and Percent of Population, Newfoundland and Labrador, By Sex, For Selected Years 1901 to 1969**

Source: D.B.S. **Province of Newfoundland, Statistical Background, 1949,** p. 6, (table 6); D.B.S. **Census of Canada, 1961,** 92-542, (table 20); **1966,** 92-610, (table 19); D.B.S. **Estimated Population By Sex and Age Group, For Canada and Provinces, June 1, 1969,** 91-202.

A- 4. **Number and Percent of Population, Newfoundland and Labrador, By Age Group, For Selected Years 1935 to 1969**

Source: D.B.S. **Province of Newfoundland, Statistical Background, 1949,** p. 8, (table 9); D.B.S. **Census of Canada, 1961,** 92-542, (table 20); **1966,** 92-610, (table 19); D.B.S. **Estimated Population By Sex and Age Group, For Canada and Provinces, June 1, 1969,** 91-202.

Definitions and Explanations:

Age classifications in the census are based on a definition which specifies completed years of age at last birthday prior to the census date.

A- 5. **Number and Percent of Male Population, Newfoundland and Labrador, By Age Group, For Selected Years 1935 to 1969**

Source: D.B.S. **Province of Newfoundland, Statistical Background, 1949,** p. 8, (table 9); D.B.S. **Census of Canada, 1961,** 92-545, (table 20); **1966,** 92-610, (table 19); D.B.S. **Estimated Population By Sex and Age Group, For Canada and Provinces, June 1, 1969,** 91-202.

Definitions and Explanations:

See A-4.

A- 6. **Number and Percent of Female Population, Newfoundland and Labrador, By Age Group, For Selected Years 1935 to 1969**

Source: D.B.S. **Province of Newfoundland, Statistical Background, 1949,** p. 8, (table 9); D.B.S. **Census of Canada, 1961,** 92-542, (table 20); **1966,** 92-610, (table 19); D.B.S. **Estimated Population By Sex and Age Group, For Canada and Provinces, June 1, 1969,** 91-202.

Definitions and Explanations:

See A-4.

A- 7. **Number and Percent of Population, Newfoundland and Labrador, By Marital Status, For Census Years 1901 to 1966**

Source: D.B.S. **Province of Newfoundland, Statistical Background, 1949,** p. 8, (table 10); D.B.S. **Census of Canada, 1961, 92-544,** (table 28); **1966,** 92-612, (table 28); Data for 1901 supplied by D.B.S. Census Division.

Definitions and Explanations:

Marital Status:

The "single" category includes only persons who have never married. The "married" classification includes all married persons whether living together or living apart for any reason, unless a divorce has been obtained.

A- 8. **Population, Newfoundland and Labrador, By Religious Denomination, For Selected Years 1857 to 1961**
Source: D.B.S. **Province of Newfoundland, Statistical Background, 1949,** p. 10, (table 12); D.B.S. **Census of Canada, 1951, Vol. 1,** (table 38); **1961,** 92-546, (table 43).

A- 9. **Number and Percent of Population, Newfoundland and Labrador, By Ethnic Origin, 1945, 1951 and 1961**
Source: D.B.S. **Province of Newfoundland, Statistical Background, 1949,** p. 12, (table 15); D.B.S. **Census of Canada, 1951, Vol. 1,** (table 34); **1961,** 92-545, (table 36).

Definitions and Explanations:

Ethnic Groups:

In the census a person's ethnic group is traced through his father.

A-10. **Population, Newfoundland and Labrador, By Census Division and Sex, 1951, 1956, 1961 and 1966**
Source: D.B.S. **Census of Canada, 1961,** 92-541, (table 16); **1966,** 92-603, (table 9).

A-11. **Urban, Rural, Rural Farm and Rural Non-Farm Population, Newfoundland and Labrador, By Census Division, 1951, 1956, 1961 and 1966**
Source: D.B.S. **Census of Canada, 1961,** 92-536, (table 13); **1966,** 92-608, (table 13).

Definitions and Explanations:

Rural and Urban:

The "urban" population in the 1956 Census included all persons residing in cities, towns and villages of 1,000 population and over, whether incorporated or unincorporated as well as the population of all parts of census metropolitan areas and other major urban areas; the remainder was classified as "rural".

In 1961 and 1966 all cities, towns and villages of 1,000 or over, whether incorporated or not, were classed as "urban", as well as urbanized fringes of (a) cities classed as metropolitan or other major urban areas, and (b) certain smaller cities where the population of the city (or town) together with its urbanized fringe amounted to 10,000 or more. The remainder of the population was classed as "rural".

Rural Farm and Rural Non-Farm:

Population, households and families are classified as "farm" or "non-farm" depending upon whether or not they were residents of a dwelling situated within the boundaries of a farm located in a rural area. A farm for 1951 and 1956 was defined as a holding of : (1) three acres or more in size, or (2) from one to three acres with agricultural production in 1950 and 1955 valued at $250 or more. This differs from 1961 and 1966 when a farm was defined as a holding of one or more acres with sales of agricultural products of $50 or more. All persons living on such holdings in rural areas are classed as "rural farm" regardless of their occupation. These figures do not include the farm operators and their families who operated farms but resided in neighbouring towns and villages at the census date. Such persons were not considered to be living on farms and their dwellings were classified as "urban" or "rural non-farm" rather than "rural farm" dwellings. Also, farm totals do not include persons living on farms in urban areas.

A-12. **Population Of Newfoundland and Labrador, By Federal Electoral Districts, 1951, 1956, 1961 and 1966**
Source: D.B.S. **Census of Canada, 1956,** (Population Of Electoral Districts), p. 1; **1961,** 92-530, (table 4); **1966,** 92-602, (table 6).

A-13. **Households, Newfoundland and Labrador, By Type and Number Of Persons Per Household, 1966**
Source: D.B.S. **Census of Canada, 1966,** 93-605, p. 34-1, (table 34).

Definitions and Explanations:

Household:

For census purposes, a household consists of a person or group of persons occupying one dwelling. It usually consists of a family group, with or without lodgers, employees, etc. However, it may consist of a group of unrelated persons, of two or more families sharing a dwelling, or of one person living alone. Every person is a member of some household, and the number of households equals the number of occupied dwellings. A dwelling is a structurally separate set of living quarters with a private entrance from outside or a common hall or stairway inside. Entrance must not be through anyone else's living quarters.

Type of household:

Households are classified as to whether they consist of one family, two or more families, or are non-family households, and whether additional persons such as relatives or lodgers are present.

In a one-family household, the family is usually that of the household head, but it may be one living as a related, lodging or other type of family with a household head who is a non-family person.

Similarly in two or more family households, one family may be that of the household head, or the household head may be a non-family person with whom two or more families are residing.

Non-family households are constituted either of one person living alone, or of a group of two or more persons not in families but living together as a household.

Average number of persons per household is based on private households since collective households are excluded from the data in this review.

A-14. **Households, St. John's, By Type and Number Of Persons Per Household, 1966**

Source: D.B.S. **Census of Canada, 1966,** 93-605, p. 35-4, (table 35).

Definitions and Explanations:

See A-13.

A-15. **Number Of Families Of Incorporated Cities, Towns and Villages Of 1,000 Population and Over, Newfoundland and Labrador, By Number Of Persons, 1966**

Source: D.B.S. **Census of Canada, 1966, Volume II** (2-9), 93-609, (tables 54, 55 and 56).

Definitions and Explanations:

Family:

A census family consists of a husband and wife (with or without children who have never married), or a parent with one or more children never married, living together in the same dwelling. Adopted children and stepchildren are counted as own children, and in fact, a family, for census purposes, may comprise a man or woman living with a guardianship child or ward under 21 years of age. It should be noted that the term "children" refers to children in families who have never married, who are under 25 years of age, living at home at the census date.

Once a child is married, he or she ceases to be considered a part of the parents' family, for census purposes, even though living in the same household. Such married children when living with husband or wife and/or children constitute a second family unit within the same household.

A-16. **Number Of Families Of Incorporated Cities, Towns and Villages Of 1,000 Population and Over, Newfoundland and Labrador, By Number Of Children, 1966**

Source: D.B.S. **Census of Canada, 1966, Vol. II** (2-10), 93-610, (tables 59, 60 and 61).

Definitions and Explanations:

See A-15.

A-17. **Available Historical Population Statistics, Newfoundland and Labrador, By Settlement, For Census Years 1901 to 1966**

Source: D.B.S. **Province of Newfoundland, Statistical Background, 1949,** p. 7, (table 8); D.B.S. **Census of Canada, 1956, Bulletin 1-6,** (table 7); **1966,** 92-603, (table 9).

Definitions and Explanations:

The population data in this table was taken from two sources. Figures prior to 1951 were obtained from censuses taken by the Government of Newfoundland, and later data was collected by censuses conducted by the Dominion Bureau of Statistics. Some of these settlements experienced boundary changes which in some cases have had an effect on the comparability of the figures from one census to another.

[1] Includes the towns of Corner Brook East, Corner Brook West and Curling.

[2] Increases or decreases from one census year to another are often the result of boundary changes. Between 1961 and 1966, for example, the town of Bay Roberts was enlarged to include adjacent communities including the town of Coley's Point. When Placentia was incorporated the municipal boundaries were extended to include Placentia South East. This will largely explain the rapid increase in the population between 1951 and 1956. Conversely, Spaniard's Bay shows a sharp decline between 1961 and 1966. During the inter-censal period part of Spaniard's Bay was organized as a municipality. The count shown is only for the municipal area. Unincorporated Spaniard's Bay, included in 1961, is excluded in 1966.

[3] NSS = Not shown separately. For the years indicated Appleton was included with Glenwood.

[4] The portion of Buchans which is owned by the American Smelting and Refining Company is not a Local Improvement District. The figures given are for the company town. Since Buchans is not incorporated, the 1966 count is not available. A small community adjacent to Buchans has been incorporated as "The Local Improvement District of Buchans". This municipality in 1966 had a population of 384.

SECTION B

HEALTH AND WELFARE

SECTION B

HEALTH AND WELFARE

B- 1. **Number Of Doctors and Registered Nurses, Per 1,000 Population, Newfoundland and Labrador, 1949 to 1968**

Source: D.B.S. **Estimated Population of Canada by Province at June 1, 1969,** 91-201, (table 1); Doctors, supplied by Newfoundland Medical Board; Registered Nurses from the **Annual Reports of the Newfoundland Department of Health,** section titled **Report of the Association of Registered Nurses of Newfoundland, 1954** to **1968.**

Definitions and Explanations:

Doctors:

All medical practitioners within the Province are required by law to register with the Newfoundland Medical Board. The figures shown represent the Medical Boards estimate of the average annual number of active resident medical practitioners for the representative calendar year. These estimates have been adjusted for net migration.

Registered Nurses:

All Registered Nurses active within the Province, whether full or part time, are required to register with the Association of Registered Nurses of Newfoundland. The figures shown represent the total number of nurses registered in the representative calendar year who were classed as active at the time of registration. Because of migration and adjustments during the year for activity and inactivity this figure does not necessarily represent the average annual number of nurses active in the Province within a year.

B- 2. **Selected Statistics Of Operating Hospitals, Newfoundland and Labrador, 1953 to 1968**

Source: Data for the years 1953 to 1967 from D.B.S. **Hospital Statistics, Volume I, Hospital Beds, 1967,** 83-210, (table 14), p. 53; 1968 from D.B.S. **Hospital Statistics Preliminary Annual Report, 1968,** 83-217, pp. 7 and 9, (tables 1 and 2).

Definitions and Explanations:

Operating Hospital:

An operating hospital is defined by D.B.S. as an institution which is operated for the medical, surgical and/or obstetrical care of in-patients, and which is licensed or approved as a hospital by the federal and/or provincial government, or by a municipality duly authorized under the laws of the province. Specifically included are institutions primarily for the treatment of tuberculosis, mental disease and mental defect.

Rated Bed Capacity:

Rated bed capacity is defined as the number of beds and cribs or of bassinets for newborn, that the hospital (or unit of the hospital) is designed to accommodate as at December 31 of the reporting year.

Admission:

An admission is defined as the formal acceptance and reception of a person as an in-patient (including infants born alive in the hospital).

In-patient:

An in-patient is defined as a patient who is duly admitted to the hospital and to whom a bed, crib or bassinet has been allocated. (This category includes stillbirths as well as patients attending a day or night centre attached to the hospital).

B- 3. **Number Of Operating Hospitals, Newfoundland and Labrador, By Type and Rated Bed Capacity, 1967 and 1968**

Source: D.B.S. **Hospital Statistics, Volume I, Hospital Beds, 1967,** 83-210, (table 17), p. 58; D.B.S. **Hospital Statistics, Preliminary Annual Report, 1968,** 83-217, p. 9, (tables 2 and 3).

Definitions and Explanations:

Operating Hospital:

See B-2.

Rated Bed Capacity:

See B-2.

Public Hospital:

A Public Hospital is defined as one recognized by the Province as a "Public Hospital" which is not operated for profit and accepts all patients regardless of ability to pay.

General Hospital:

A General Hospital is defined as a hospital which provides for the treatment and care of all types of diseases or at least a wide range of conditions.

Chronic, Convalescent and Rehabilitation Hospitals:

Defined as hospitals which primarily provide for the treatment of conditions requiring long-term care or for treatment of patients who are considered to be in the recovery stage of illness, especially where this is a long-term process, and for those patients who are being rehabilitated.

Other Hospitals:

Other Hospitals are defined as those which primarily provide for the treatment of a particular type of disease, condition or case such as maternity, communicable disease, orthopaedic, neurological and cancer, or a hospital which provides a combination of various types of service which cannot be classified into chronic, convalescent or rehabilition.

B- 4. **Number and Rate Of Deaths From Cancer and Tuberculosis, Newfoundland and Labrador, 1950 to 1968**

Source: D.B.S. **Estimated Population of Canada by Province at June 1, 1969,** 91-201, (table 1); Data supplied by D.B.S., Health and Welfare Division, Vital Statistics Section.

B- 5. **Number Of Individuals and Heads Of Families Receiving Social Assistance, Newfoundland and Labrador, By Type, 1951 to 1969**

Source: Data for 1951 to 1968 from the **Annual Report of the Newfoundland Department of Public Welfare for the Year Ended March 31, 1968,** pp. 27 and 29; Data for 1969 supplied by the Department of Public Welfare, Government of Newfoundland and Labrador.

Definitions and Explanations:

Commencing January 1966 a number of persons in receipt of Old Age Assistance were phased to Old Age Security. Persons who did not qualitfy for Old Age Security were transferred to Long Term Assistance commencing January 1, 1968.

As of January 1969 some 1,250 to 1,300 persons were transferred from Disabled Persons Allowance to Long Term Assistance. Those remaining in receipt of Disabled Persons Allowance after that time did not qualify for Long Term Assistance.

Long Term Social Assistance in Cash:

Long Term Social Assistance is assistance granted for a period of six months or more to those who qualify. Persons in receipt of Long Term Assistance are those who for social or physical reasons are unable to maintain themselves or their families. Those persons in question are the incapacitated, disabled, long term sick, widows, deserted wives, etc. Females of 50 years and over and males of 65 years and over automatically qualify on application.

Short Term Assistance in Kind:

Short term assistance is that granted on a monthly basis up to a period of six months to the temporary sick and temporary unemployed. Due to changes in the concept of short term assistance, persons in receipt of food orders only have been given. In addition, assistance in kind is given in the form of fuel, rent, clothing, household maintenance and utility.

B- 6. **Selected Statistics Of Social Assistance, Newfoundland and Labrador, By Provincial Electoral District, March, 1968**

B- 9. Number Of Children In Institutions and Foster Homes, and Adoptions Placed or Recognized, Newfoundland and Labrador, Fiscal Years 1950-51 to 1967-68

Source: Annual Report of the Newfoundland Department of Public Welfare for the year ended March 31, 1968, pp. 33 and 34.

Definitions and Explanations:

Adoptions Placed or Recognized:

Adoptions Recognized are adoptions approved by law where the child in question is already a resident in the home in which it is adopted (for example, children previously living with relatives or in foster homes). Adoptions Placed are those adopted into homes directly from institutions or foster homes.

SECTION C

LABOUR FORCE

SECTION C

LABOUR FORCE

C- 1. **Total Population 14 Years Of Age and Over, Participation Rate, Labour Force, Employed, Unemployed, Unemployment Rate, Newfoundland and Labrador, 1949 to 1969**

Source: D.B.S. **The Labour Force, November 1945–July 1958,** 71-502, (table 12); D.B.S. **Special Labour Force Survey:** Newfoundland and Maritimes (special tables 9712-517 and 9712-519), Atlantic and Prairie Regions (special table 9712-525).

Definitions and Explanations:

Labour Force:

The civilian labour force is composed of that portion of the civilian noninstitutional population 14 years of age and over who, during the reference week, were employed or unemployed.

Employed:

The employed includes all persons who, during the reference week:

(a) Did any work for pay or profit;

(b) Did any work which contributed to the running of a farm or business operated by a related member of the household; or

(c) Had a job, but were not at work, because of bad weather, illness, industrial dispute, or vacation, or because they were taking time off for other reasons.

Persons who had jobs but did not work during the reference week and who also looked for work are included in the unemployed as persons without work and seeking work.

Unemployed:

The unemployed includes all persons who, through the reference week:

(a) Were without work and seeking work, i.e., did not work during the reference week and were looking for work; or would have been looking for work except they were temporarily ill, were on indefinite or prolonged layoff, or believed no suitable work was available in the community; or

(b) Were temporarily laid off for the full week, i.e., were waiting to be called back to a job from which they had been laid off for less than 30 days.

Not in the Labour Force:

Those not in the labour force include all civilians 14 years of age and over (exclusive of institutional population) who are not classified as employed or unemployed. This category includes those: going to school; keeping house; too old or otherwise unable to work; and voluntarily idle or retired. Housewives, students and others who worked part-time are classified as employed. If they looked for work they are classified as unemployed.

C- 2. **Male Population 14 Years Of Age and Over, Participation Rate, Labour Force, Employed, Unemployed, Newfoundland and Labrador, 1949 to 1969**

Source: D.B.S. **The Labour Force, November 1945–July 1958,** 71-502, (table 12); D.B.S. **Special Labour Force Survey:** Newfoundland and Maritimes (special tables 9712-517 and 9712-519), Atlantic and Prairie Regions (special table 9712-525).

Definitions and Explanations:

See C-1.

C- 4. **Labour Force, Newfoundland and Labrador, By Age Group and Sex, 1951 and 1961**

Source: D.B.S. **Census of Canada, 1951, Volume IV,** (table II); **1961,** 94-524, (table 9).

C- 5. **Labour Force, Newfoundland and Labrador, By Occupation Group and Educational Level, 1961**

Source: D.B.S. **Census of Canada, 1961,** 94-510, (table 17).

Definitions and Explanations:

Labour Force:

The 1961 Census labour force includes all persons 15 years of age and over, who were reported as having a job of any kind, either part-time or full-time (even if they were not at work) or were reported as looking for work, during the week prior to enumeration. It should be noted that this Census definition of Labour Force differs from the definition used in the **Special Labour Force Survey** (see C-1).

Occupational Classification:

Occupations are classified under group titles, mainly according to the kind of processes performed and the material worked upon, though certain classes take into consideration training and skill, tools and equipment used and/or working environment, etc. All persons are classified according to the nature of their work regardless of the kind of establishment in which it is carried on or their status in that establishment.

Educational Level:

This refers to the highest grade or year of schooling ever attended.

Fishermen, Trappers and Hunters:

Census figures show what appears to be an unrealistic decline in the number of Fishermen, Trappers and Hunters from 1951 to 1961. The Census Division of the Dominion Bureau of Statistics explain this drastic drop as a result of various factors. They feel that there was a poor count of the inactive seekers of work, and many of these did not get counted in the labour force at all. They also point out that there was a difference in the phrasing of the question relating to activity in 1961, and this caused a drop in their assessment of the number of self-employed fishermen perhaps accentuated by the late start of the fishing season in 1961. The census statistics do show a major drop in the number of self-employed fishermen in Newfoundland and Labrador; from 16,663 in 1951 to 5,974 in 1961, some of whom were, however, recorded as working in the previous twelve months. During this same period the number classed as employees actually increased from 1.324 to 1,996. The relevant statistics are as follows:

NUMBER OF FISHERMEN, TRAPPERS AND HUNTERS IN THE LABOUR FORCE, BY CLASS OF WORKER & SEX, NEWFOUNDLAND AND LABRADOR, 1951 AND 1961

Occupation & Class of Worker	1951 Census Labour Force		1961 Census Labour Force		Worked Previous Twelve Months	
	Male	Female	Male	Female	Male	Female
Fishermen, trappers & hunters	18.366	17	8,167	16	4,538	18
Self-employed	16,650	13	5,968	6	3,137	4
Employees	1.320	4	1,989	7	1,264	2
Unpaid family workers	396	–	210	3	137	12

However, in 1961 the annual count by the Federal Department of Fisheries Officers revealed that there were actually 18,756 fishermen in Newfoundland and Labrador.

C- 6. **Labour Force, Newfoundland and Labrador, By Industry and Class Of Worker, 1961**

Source: D.B.S. **Census of Canada, 1961**, 94-524. (tables 8 and 9).

Definitions and Explanations:

Class of Worker:

Persons in the labour force, except those looking for their first job, were classified as:

(a) Wage-earners – Persons who worked for others for wages, salary, tips or piece rates or who worked for others in non-family enterprises for payment in kind;

(b) Self-employed — Persons who operated their own business, farm or professional practice with or without paid help;

(c) Unpaid family workers – Persons who worked without regular money wages at tasks (other than home housework) which contributed to the operation of a farm or business owned and operated by some member of the household related by blood, marriage or adoption.

C- 7. **Total Labour Force 15 Years Of Age and Over, Newfoundland and Labrador, By Industry Divisions, Showing Occupation Divisions and Selected Occupations, 1951 and 1961**

Source: Data supplied by D.B.S., Census Division, Economic Characteristics Section.

Definitions and Explanations:

Occupational Classification:

Occupations are classified under group titles, mainly according to the kind of processes performed and the material worked upon, though certain classes take into consideration training and skill, tools and equipment used and/or working environment, etc. All persons are classified according to the nature of their work regardless of the kind of establishment in which it is carried on or their status in that establishment. For example, a motor vehicle repairman is classified to the occupation class "Mechanics and repairmen, motor vehicle" whether he works for a motor vehicle repair shop, a trucking firm, a factory, or a store and whether he owns his own repair shop or works for someone else. The group of "Labourers, n.e.s." includes workers in "unskilled" occupations except those engaged in farming, fishing, logging or mining (except in quarries and petroleum and gas wells) operations. The "Labourers, n.e.s." class also excludes other specified categories such as "Longshoremen and Stevedores", and "Sectionmen and Trackmen".

C-18. **Estimates Of Employees, Forestry, Newfoundland and Labrador, By Month, 1961 to 1969**
Source: D.B.S. **Estimates of Employees By Province and Industry, 1961–1968**, 72-508, Occasional. (table 3); D.B.S. **Estimates of Employees By Province and Industry**, 72-008, Monthly, January-September, 1969, (table 3).

Definitions and Explanations:

These estimates are based almost entirely on surveys of establishments. Establishments employing fewer than 15 persons are included in a small firm sample survey where the sample is based on a stratification by area and industry. All other establishments are self representing.

The establishment is defined as the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics. The data in the main refer to the last week in the specified month and include employees who are paid for rendering current services or are on paid absence during that period. Excluded are proprietors, directors and firm members including those who are actively engaged in the operation of the firm, pensioners, own-account workers, unpaid family workers, employees working less than the equivalent of one full day in the week, employees absent without pay and persons providing services to the establishment on a contract basis.

[1] The labour force figures exclude a few persons seeking work who have never been employed.

[2] There were 4,565 additional Fishermen, Trappers and Hunters (4,547 males and 18 females) reported as not in the labour force at the census date but who had worked during the previous year. (See descriptive text in C-5).

[3] There were 4,603 additional persons (4,578 males and 25 females) reported as not in the labour force but who had worked during the previous year in the Fishing and Trapping Industry. (See descriptive text in C-5).

[4] The group of "Labourers, n.e.s.", includes workers in "unskilled" occupations except those engaged in farming, fishing, logging or mining (except in quarries and petroleum and gas wells) operations. The "Labourers, n.e.s.", class also excludes other specified categories such as "longshoremen and stevedores", and "sectionmen and trackmen".

SECTION D

WAGES AND WORKING CONDITIONS

SECTION D

WAGES AND WORKING CONDITIONS

D- 1. **Wages and Salaries, Adjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1951 to 1969**

Source: D.B.S. **Estimates of Labour Income, 72-005, August 1969,** p. 9, (table 4); **July 1966,** p. 9, (table 4); Data for 1951 to 1960 supplied by D.B.S., Labour Division.

Definitions and Explanations:

Wages and salaries are specified to include living allowances, bonuses, commissions, and "tips" and is measured prior to deductions of all kinds (income tax, employees' contributions to the Unemployment Insurance Fund and to welfare and pension funds, etc.). Both money payments and payments in kind (i.e. free board and lodging) made to, or on behalf of, residents of Canada, excluding military pay and allowances, are included in the total of wages and salaries. Retroactive wage payments are included in the month in which they are paid. Supplementary labour income comprises payments made by employers on behalf of their employees in order to provide them with future benefits, either definite or contingent. Specifically, these payments include employers' contributions to employee welfare and pension funds, to workmen's compensation and industrial vacation funds, and to the Unemployment Insurance Fund. Contributions to armed forces pension funds are also included. Labour income is defined as the total of wages and salaries and of supplementary labour income.

D- 2. **Wages and Salaries, Unadjusted For Seasonal Variation, Newfoundland and Labrador, By Month, 1951 to 1969**

Source: D.B.S. **Estimates of Labour Income, 72-005, August 1969,** p. 8, (table 3); **July 1966,** p. 8, (table 3); Data for 1951 to 1960 supplied by D.B.S., Labour Division.

Definitions and Explanations:

See D-1.

D- 3. **Average Weekly Wages and Salaries, Forestry, Newfoundland and Labrador, By Month, 1957 to 1967**

Source: D.B.S. **Review of Employment and Average Weekly Wages and Salaries, 72-201,** pp. 133 and 134, (table 12); D.B.S. **Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, 72-504,** pp. 163 to 166, (table 5); D.B.S. **Employment and Average Weekly Wages and Salaries, 72-002,** Monthly, (table 3); Data for 1957 to 1960 supplied by D.B.S., Labour Division.

Definitions and Explanations:

These figures are obtained from a survey which covers larger firms only, that is, firms having 20 or more employees in any month of the year.

Average Weekly Wages and Salaries:

The wages and salaries are derived from payrolls which include gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, overtime wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

In contrast to the concept used in D-1, the payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus, the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Industrial Classification:

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

D- 4. **Average Weekly Wages and Salaries, Mining (Including Milling), Newfoundland and Labrador, By Month, 1957 to 1969**

Tables D-11 to D-24 Inclusive – Definitions and Explanatory Notes

These figures are obtained from a survey which covers larger firms only, that is, firms having 20 or more employees in any month of the year.

Wage Earners:

Wage earners are defined as those employees engaged in actual production and related operations, including working foremen doing work similar to that of the employees they supervise. Also included are maintenance, warehouse and delivery staffs, routemen, driver-salesmen, sales clerks in retail stores, waitresses, etc.

Wage earners not receiving pay for any time worked during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or they draw pay from their employers (e.g. vacation pay). The exclusion of persons affected by industrial disputes is one of the main sources of irregular fluctuations in the series.

Industrial Classification:

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

Man-hours:

The man-hours statistics include hours worked by full-time and part-time wage earners, including overtime hours actually worked. Premium or penalty hours credited for purposes of computing overtime payments are excluded. Hours credited to wage earners absent on leave with pay in the reported pay periods are included in the statistics as though the hours had been worked.

Wages:

The wages of reported wage earners are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are straight-time wages, overtime wages, cost-of-living allowances, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The wages concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus, the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, or other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the wages data and the employees are considered to be absent without pay during the period they are on vacation.

Averages:

The average weekly hours figure is obtained by dividing total weekly man-hours by the total number of wage earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages by total weekly hours. Average weekly wages are obtained by dividing total weekly wages by the total number of wage earners. It should be noted that total hours include overtime hours actually worked and that the wage earner total includes part-time wage earners and casuals working more than the equivalent of one day a week.

Index Numbers:

Index numbers are calculated by dividing the current month's employment by one-twelth of the total base period employment. The current employment consists of all employment in establishments that meet the size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

D-11. Average Hourly Earnings Of Hourly-Rated Wage Earners, Mining (Including Milling), Newfoundland and Labrador, By Month, 1957 to 1969

SECTION E

EDUCATION

SECTION E

EDUCATION

E- 1. **Enrolment in Public Schools, Newfoundland and Labrador, By Grade, 1924-25 to 1968-69**

Source: Data supplied by D.B.S., Education Division, Elementary-Secondary Section.

Definitions and Explanations:

Public Schools:

Public Schools are defined as schools which operate under the provincial school system with locally appointed or elected school boards.

Junior Auxiliary:

Special classes set up for slow learners in elementary grades.

Special:

Comprised mainly of students enrolled in one-year commercial courses.

E- 2. **Enrolment in Private Schools, Newfoundland and Labrador, By Grade, 1955-56 to 1969-70**

Source: Data supplied by D.B.S., Education Division, Elementary-Secondary Section.

Definitions and Explanations:

Private School:

Private Schools are defined as those which generally provide a curriculum roughly parallel to that of Public Schools but are not under direct provincial control.

E- 3. **Selected Statistics of Public Schools, Newfoundland and Labrador, 1949-50 to 1968-69**

Source: Statistical Supplements to the Annual Report of the Newfoundland Department of Education, 1949-50 to 1967-68 (tables 1 and 2); Data for 1968-69 supplied by D.B.S., Education Division, Elementary-Secondary Section.

Definitions and Explanations:

Public School:

See E-1.

Teachers:

Teaching staffs include school principals and teachers of special subjects or classes, as well as regular full-time classroom teachers, but exclude inspectors and superintendents of schools.

E- 4. **Number and Percentage Distribution of Public Schools, Newfoundland and Labrador, By Number of Classrooms, For Selected Years 1945-46 to 1967-68**

Source: Statistical Supplements of the Annual Report of the Department of Education, 1956 and 1962, (table V); **1968,** (table IV).

Definitions and Explanations:

See E-1.

E- 5. **Number of Teachers in Public Schools, Newfoundland and Labrador, By Sex and Median Salary, 1945-46 to 1968-69**

Source: D.B.S. **Salaries and Qualifications of Teachers in Public Elementary and Secondary Schools,** 81-202, **1965-66 to 1967-68;** (tables 1 and 7); Data for 1968-69 supplied by D.B.S., Education Division, Elementary-Secondary Section.

Definitions and Explanations:

See E-1 and E-3.

E- 6. **Teachers in Public Schools, Newfoundland and Labrador, By Certificate Held, For Selected Years 1949-50 to 1968-69**

Source: Statistical Supplements to the Annual Report of the Department of Education, 1956, 1959, 1966 and 1968, (table II); Data for 1968-69 supplied by D.B.S., Education Division, Elementary-Secondary Section.

E- 7. **Pupils Writing Public Examinations and Percentage Passing, Newfoundland and Labrador, By Grade, 1949 to 1969**

Source: Annual Reports of the Newfoundland Department of Education, 1956, (tables II and III); **1963,** (tables I and II); **1966,** (tables II and III); **1967 and 1968,** (table I); Data for 1968 and 1969 supplied by Department of Education, Government of Newfoundland and Labrador.

E- 8. **Enrolment, Memorial University of Newfoundland, 1949-50 to 1969-70**

Source: Memorial University of Newfoundland Calendar, 1969-70, p. 270. Data for 1969-70 supplied by Office of the Registrar, Memorial University of Newfoundland.

Definitions and Explanations:

Regular Students:

Students who meet the matriculation requirements of the University and who are registered in at least four courses in any semester are termed Regular Students. For purposes of the Residence Requirements, a student is deemed to have been in attendance for an academic year as a Regular Student if during each of two semesters he was registered in at least four courses and at the end of this time had completed at least three full-credit courses or equivalent.

First Year:

Students who have been registered from Junior Matriculation, or its equivalent, for the current academic year are classified as First-Year students.

Second Year:

Students who have earned not less than three credits at the beginning of the academic year are classified as Second-Year students.

Third Year:

Students who have earned not less than eight credits at the beginning of the academic year are classified as Third-Year students.

Fourth Year:

Students who have earned not less than thirteen credits at the beginning of the academic year are classified as Fourth-Year students.

Fifth Year:

Students who have earned not less than eighteen credits at the beginning of the academic year are classified as Fifth-Year students.

Partial Students:

Students who meet the matriculation requirements of the University and who are not doing a full year's work but are permitted, subject to the Residence Requirement, to take courses including evening and Summer courses for credit towards a degree are termed Partial Students.

E- 9. **Students Entering The College of Trades and Technology, St. John's, By Educational Level, 1963-64 to 1968-69**

Source: Data supplied by Office of the Registrar, College of Trades and Technology, St. John's, Newfoundland.

Definitions and Explanations:

The figures include only students entering the College of Trades and Technology, St. John's, students entering regional vocational schools are not included. The number of students at the College who entered with grade VIII and less includes those taking basic upgrading courses. Many of these are included with the grade VIII's, IX's, and X's in trade courses the following year.

E-10. **Selected Training Statistics of the College of Fisheries, Navigation, Marine Engineering and Electronics, St. John's, January 1964 to August 1969**

Source: Data supplied by Office of the Registrar, College of Fisheries, Navigation, Marine Engineering and Electronics, St. John's, Newfoundland.

E-11. **Newfoundlanders Enrolled in Blind and Deaf Schools, 1958-59 to 1969-70**

Source: Data supplied by D.B.S., Education Division, Elementary-Secondary Section.

E-12. **Selected Statistics Of Public Libraries, Newfoundland and Labrador, 1957 to 1967**

Source: D.B.S. **Survey of Libraries, Part I, Public Libraries, 81-205, 1957 to 1960,** (table 1); **1961 to 1963,** (table 2); **1964,** (table 4); **1965 to 1967,** (table 1).

Definitions and Explanations:

Public Library:

A library for the use of the public, supported chiefly by taxation, and generally governed by a public library board.

Books:

The number of volumes, whether bound or unbound which have been made available for the readers use.

Circulation:

Recorded number of charged issues for in-library and out-of-library use.

SECTION F

GROSS PROVINCIAL PRODUCT AND PERSONAL INCOME

SECTION F

GROSS PROVINCIAL PRODUCT AND PERSONAL INCOME

F- 1. **Total and Per Capita Gross Provincial Product and Personal Income, Newfoundland and Labrador, 1949 to 1968**

Source: D.B.S. **Estimated Population Of Canada By Province at June 1, 1969,** 91-201, (table 1); Gross Provincial Product estimated by Newfoundland Department of Finance, Economics and Statistics Division; Personal Income (Original Concept) from D.B.S. **National Accounts, Income and Expenditure,** 13-201, **1959, 1962, 1965 to 1967,** (table 28); **National Accounts, Income and Expenditure,** 13-502—Occasional, 1926-1956, (table 28); Personal Income (Revised Concept) from D.B.S., National Accounts, Production and Productivity Division.

Definitions and Explanations:

Gross Provincial Product (G.P.P.):

Gross Provincial Product is defined as the market value of the unduplicated total of goods and services produced in a given period of time (usually a year), by the factors of production which are resident in a particular economy. In other words, G.P.P. is the sum of what accrues to the various factors of production resident in a given economy for their part in the productive process which leads to the final market value of a good or service.

G.P.P. corresponds to the national measurement of output, Gross National Product (G.N.P.). In estimating G.P.P. we should, therefore, attempt to obtain the components of G.N.P. on a provincial basis. However, because of the non-availability of all G.N.P. components on a provincial basis we have used a methodology known as the Income Method of estimating G.P.P. This consists of taking Personal Income (as defined below) as the major components in G.P.P. and adding items which are not components of Personal Income but should be included in G.P.P. (i.e. Retained Earnings and Capital Consumption Allowances); and subtracting items which are in Personal Income but do not result from production (i.e. Transfer Payments). It should also be noted that since G.P.P. includes only returns to factors of production resident within the province, that portion of total market value of goods and services resulting from imports and all income (dividends, interest, etc.) accruing to outside interests are not included in G.P.P.

It should be noted that in 1968 the National Accounts concept of G.N.P. and therefore many of its components was revised. The above methodology of estimating G.P.P. has been based on the original concept of national accounts. Therefore, when comparing G.P.P. (as shown) and Personal Income series the original concept of Personal Income should be used.

Personal Income (Original Concept):

The degree to which the change in the National Accounts concepts will affect both the methodology utilized and the final G.P.P. series resulting for the Province was not determined at the time of publication.

Personal Income (Original Concept) measures all income received by Canadian residents and includes factor income of persons; transfer payments received by persons, such as family allowances, unemployment insurance benefits, social assistance, etc., and types of investment income accumulated on behalf of persons by life insurance companies, private pension funds, and similar institutions. It excludes incomes of factors of production which are not paid out to persons, such as undistributed corporation profits and profits of government enterprises. In the case of farm operators and other unincorporated business, however, the whole net income is included in personal income since it is not statistically feasible to separate withdrawals for personal use from amounts retained in the business. (For further detail on the components of personal income see Table F-2).

Personal Income (Revised Concept):

For the explanation of conceptual changes which have occurred from "Personal Income (Original Concept)" to "Personal Income (Revised Concept)", see F-3; and for further elaboration see D.B.S. **National Income and Expenditure Accounts, 1926-1968,** dated August 1969.

F- 2. **Personal Disposable Income and Personal Income (Original Concept) and its main Components, Newfoundland and Labrador, 1949 to 1967**

Source: D.B.S. National Accounts Income and Expenditure, **1962 and 1965 to 1967,** 13-201; D.B.S. **National Accounts Income and Expenditure 1926-1956,** 13-502, Occasional, (tables 28, 30, 31, 33, 34 and 35).

Definitions and Explanations:

Personal Income:

See F-1.

Personal Disposable Income:

Personal Disposable Income is obtained by deducting direct taxes (Income Taxes, Succession Duties, etc.) from personal income. This represnts the amount out of which personal expenditure on goods and services is made—the unconsumed residual being personal net savings.

Wages, Salaries, and Supplementary Labour Income:

The estimated total of wages and salaries include all such payments made to residents of Newfoundland and Labrador, including payments in kind such as free board and lodging. It does not include earnings from self-employment or partnerships, income from independent professional practice, income of farmers from farming operations, or military pay and allowances. Wages and salaries are estimated before tax deductions, and before contributions of employees to unemployment insurance, pensions, and other social insurance schemes. Bonuses, commissions, and retroactive wage increases are included in the period in which they are paid because of the statistical difficulties of allocating these items to the period in which they were earned.

Supplementary labour income consists of other expenditures by employers on labour account that can be regarded as payment for employees services. Included here are employer's contributions to pension funds, employee welfare funds, unemployment insurance, and workmen's compensation.

Net Income of Non-Farm Unincorporated Business:

This item includes the net income of all non-farm unincorporated businesses for most industries and also includes the net income of independent professional practitioners such as doctors, dentists, nurses, lawyers and engineers.

Interest Dividends and Net Rental Income of Persons:

This item includes the interest dividends and net rental income of persons from provincial business and from non-resident sources, interest on the public debt received by persons, and the imputed net rent on owner-occupied dwellings.

Government Transfer Payments:

Includes elements of personal income which are not earnings from the production of goods and services e.g., family allowances, old age pensions, outpayments of social insurance and government pensions fund, social assistance, etc.

Other:

The four major components of Personal Income shown in this table will not add to the figure shown for total Personal Income because of the following factors:

1. Employer and employee contributions to social insurance and government pension funds are included in the component shown as "Wages, Salaries and Supplementary Labour Income" but are deducted when determining total personal income.
2. Military pay and allowances are not included in the component shown as "Wages, Salaries and Supplementary Labour Income" but are included in the total personal income figures.
3. Net Income of farm operators from farm production and charitable contributions to persons by corporations are included in "Personal Income" but are not shown as separate components.

For further elaboration see **National Accounts, Income and Expenditure, 1967,** (tables 7 and 28 to 35).

F- 3. **Personal Disposable Income and Personal Income (Revised Concept) and its Main Components, Newfoundland and Labrador, 1949 to 1968**

Source: Data supplied by D.B.S., National Accounts, Production and Productivity Division.

Definitions and Explanations:

As noted in Table F-1 the National Accounts concept of Personal Income has been changed. The series based on the revised concept of Personal Income demonstrates that aggregate Personal Income has decreased slightly for the Province. Major changes in the components of Personal Income from the original to the revised concept were as follows:

1. Public hospitals have been transferred from the personal to the government sector. The portion of hospital expenses paid by government on behalf of persons was shown under the original concept as a current transfer from government to persons. With the inception of hospital insurance, and particularly the universal application of the Hospital Insurance and Diagnostic Services Act in 1967, hospitals have increasingly come under the financial and operational control of government departments or agencies, with the purchase of hospital services mainly by government on behalf of individuals. Therefore, in the personal sector, the level of income has been lowered by discontinuing government transfer payments to hospitals.
2. Employer and employee contributions to social insurance and public service pensions are now treated as a transfer payment (tax outlay) from persons to government, instead of a deduc-

tion from personal income. Personal Disposable Income is unaffected, with personal income and tax outlays rising equally.

3. Net rental income of persons, formerly classified with interest and miscellaneous investment income, is now included with net income of non-farm unincorporated business.
4. Investment income of trusteed pension plans covering government employees has been reclassified to personal investment income from government investment income.
5. Employer contributions to pensions of armed forces have been reclassified from wages, salaries and supplementary labour income to military pay and allowances.

Other:

Includes military pay and allowances; Net income of farm operators from farm production; charitable contributions to persons by corporations; Capital assistance to unincorporated business; bad debts written off by persons; and transfers to non-residents.

For further elaboration see D.B.S. **National Income and Expenditure Accounts, 1926-1968**, dated August, 1969.

F- 4. **Census Value Added in Commodity Producing Industries, Newfoundland and Labrador, 1949 to 1967**

Source: D.B.S. **Survey of Production, 1967**, 61-202, (tables 6, 7, and 9 to 15).

Definitions and Explanations:

Census value added is obtained by deducting from the gross value of shipments or accrued operating revenue, the cost of intermediate materials, including custom charges. The gross value of shipments is taken exclusive of excise and other sales taxes and is adjusted for changes in inventory of finished goods and goods-in-process.

In some cases several statistical series have been shown within an industry to provide linkages in the data. This was made necessary by changes in classifications and concepts within some commodity producing industries.

The series shown in this table may not necessarily correspond with the net value series shown in the various sector tables in this review because of variations in concepts.

Explanations of conceptual breaks may in most cases be obtained through reference to the source publication (61-202). The following breaks occurred in the census value added series in the period 1949 to 1967:

1. Forestry–Break occurs in 1963–see Section L (Forestry) for further explanation.
2. Mining–Breaks occur in 1959 and 1961.
3. Manufacturing–Breaks occur in 1959 and 1961. See Section N (Manufacturing) for further explanation.
4. Construction—Break occurs in 1961.

1968	507	. .	. .	744	. .	. .	1,467

---

[1] When comparing Gross Provincial Product and Personal Income Series, the original Concept of Personal Income should be used in that G.P.P. data was estimated by means of a methodology in which the original Personal Income concept was a major component. (See Definitions and Explanations for further elaboration.)

[2] In 1968 D.B.S. revised its concept of Personal Income. (See Definitions and Explanations for further elaboration.)

[3] Includes fish and forest product processing.

SECTION G

PROVINCIAL GOVERNMENT FINANCE

SECTION G

PROVINCIAL GOVERNMENT FINANCE

G- 1. **Gross Revenue, Current and Capital Accounts, Government of Newfoundland and Labrador, by Type and Major Source, 1949-50 to 1969-70**

Source: Derived from the **Public Accounts of the Province of Newfoundland, 1949-50 to 1967-68.** Subject to Audit figures for 1968-69 were supplied by the Central Accounts Division, Department of Finance; Data for 1969-70 from **Government of Newfoundland and Labrador, Estimates of Revenue and Expenditure for the Financial Year 1st. April 1969–31st. March 1970, (as approved by the legislature).**

Definitions and Explanations:

Gross Current Account Revenue from the Federal Government:

Grants-in-Aid: Includes federal contributions to various shared cost programs, i.e. Technical and Vocational Education, Hospital Insurance, Canada Assistance Plan, Social Assistance, Urban Renewal, etc. **Tax Rental and Tax Equilization:** From 1949-50 to 1961-62 the Government of Newfoundland rented to the Federal Government its right to impose certain taxes. In lieu of these rights, the Province received from Ottawa sums of money as stated in the tax rental agreements. This money also included adjustments for tax equilization. Since 1962-63 the money previously recorded under the tax rental headings has been allocated under the headings; Succession Duty, Utility Companies Tax, Tax Equalization, and Personal and Corporate Income Taxes (from 1962-63 Personal and Corporate taxes have been determined by Provincial Statute under the Tax Collection Agreement and are shown as Provincial Taxes).

Other: Includes Statutory Subsidies, Atlantic Provinces Adjustment Grants, Award under Term 29, Transitional Grants prior to 1962-63, and Utility Companies Tax and Sucession Duties after 1961-62.

Other Provincial Taxes:

Includes Fire Insurance Premium Tax, Insurance Companies Tax, Entertainment, Tobacco, Telegraphic, Pari-mutual, and Mining Tax in 1968-69 and 1969-70.

Other Provincial Sources (Current Account):

Includes Institutional charges for Fees, Medicines, etc.; Recoveries on account of Board and Lodging, Contributions to Pension Funds, Interest, Court Fines, Inland Revenue Stamps, etc.

Other Gross Capital Account Revenue from Federal Government:

Includes contributions towards Roads to Resources, Schools and Housing for Indians and Eskimos, Hospital Construction and Equipment.

Gross Capital Account Revenue from Provincial Government:

Includes contributions towards private and access roads, loan recoveries, earnings on investments, etc.

Pre-Union Surplus Account:

Revenue accruing from the liquidation of pre-union assets.

G- 2. **Gross Current and Capital Account Expenditures, Government of Newfoundland and Labrador, By Department, 1949-50 to 1969-70**

Source: **The Public Accounts of the Province of Newfoundland, 1949-50 to 1967-68;** Data for 1968-69 supplied by Central Accounts Division, Department of Finance; Data for 1969-70 from **Government of Newfoundland and Labrador, Estimates of Revenue and Expenditure for the Financial Year 1st. April, 1969—31st. March, 1970. (as approved by the legislature).**

Definitions and Explanations:

Items classified in the "Public Accounts" as expenditures on account of Pre-union Liabilities for the period 1949-50 to 1955-56 were allocated to Current and Capital Accounts on a basis comparable to the classification of these items in future years. During this period those items classified as Capital Account Expenditures were comprised mainly of the item Expenditures on account of Pre-union Liabilities for the Extension of Public Services.

In 1967-68 a functional budgeting system was adopted by the Province. This means that items such as repair and maintenance, light, heat, power, construction and extension (Department of Public Works) and office equipment and supplies (Department of Supply) were transferred to and reflected in the expenditure of the department which availed of the service. Commencing in 1967-68 transferred items are reflected as expenditures of the recipient department and not in the transferring department. This fact must be considered when analyzing changes in departmental expenditure from the above series, particularly from 1966-67 to 1967-68.

Departmental titles and functions have changed over the years. The following changes occurred in departmental titles in the period 1949-50 to 1969-70:

1. The present Department of Mines, Agriculture and Resources:
   Department of National Resources 1949-50 to 1951-52;
   Department of Mines and Resources 1952-53 to 1959-60;
2. The present Department of Justice:
   Department of the Attorney General prior to 1966-67.
3. The present Newfoundland Liquor Commission:
   Board of Liquor Control prior to 1968-69.
4. The present Department of Municipal Affairs & Housing:
   Department of Supply prior to 1952-53;
   Department of Municipal Affairs and Supply 1952-53 to 1965-66;
   Department of Municipal Affairs and Housing 1966-67 to 1969-70.
5. The present Department of Fisheries:
   Department of Fisheries and Co-operatives prior to 1957-58.
6. The function of Highways, Roads and Bridges was undertaken by the Department of Public Works prior to 1957-58 at which time the Department of Highways was created.

It should also be noted that in 1968-69 and 1969-70 Sinking Fund expenditures are included under Consolidated Fund Services, Capital Accounts. Prior to this time they were classified as current account expenditures under Consolidated Fund Services.

G-3 **Gross Current and Capital Account Expenditures, Government of Newfoundland and Labrador, By Function, 1949-50 to 1969-70**

Source: Derived from sources as shown in Table G-2.

Definitions and Explanations:

The data shown in Table G-3 will not necessarily correspond to the total expenditure of the department carrying a corresponding title. Items have been transferred between departments which are considered to be of a different functional nature than that performed in a particular department. In essence, the principles of the functional budgeting system adopted in 1967-68 (see notes Table G-2) have been applied to the years 1949-50 to 1966-67. Therefore, functional expenditure figures shown for 1967-68 to 1969-70 will show greater correspondence to department expenditure totals. It was not possible to break out certain current account items functionally in the pre 1967-68 period, i.e., Repair and Maintenance, Light, Heat and Power, etc.

Interest on Public Debt in the period 1960-61 to 1969-70 includes only interest on direct government short-term borrowing and bonded debt. Interest on the borrowings of Crown Building Corporations (Rental Purchase) is not included but has been allocated functionally according to the function of the building on which the interest was paid. In determining total interest paid on borrowings by the Government of Newfoundland and Labrador interest on Crown Building Corporation debentures should be added. These figures, however, should not be added to total expenditures since they have already been transferred functionally as noted above. The redemption of Crown Building Corporation bonds has also been transferred functionally; therefore, the same situation would apply when determining the annual expenditure on debt redemption by the Province. The following are the expenditures on interest and debt redemption of Crown Building Corporations, in the period 1960-61 to 1969-70:

Year	Interest on Borrowings of Crown Building Corporations	Redemption of Bonds of Crown Building Corporations
	(Thousands of Dollars)	
1960-61	646	–
1961-62	1,508	–
1962-63	1,975	–
1963-64	286	2,849
1964-65	402	3,514
1965-66	3,622	1,130
1966-67	4,628	1,416
1967-68	4,459	1,893
1968-69 (Subject to Audit)	4,375	1,770
1969-70 (Estimates)	4,318	1,952

C- 4. **Total and Per Capita Direct and Guaranteed Debt, Government of Newfoundland and Labrador, as of March 31 of the Fiscal Years 1949-50 to 1968-69.**

Source: Derived from **The Public Accounts of Newfoundland and Labrador, 1949-50 to 1967-68**; Data for 1968-69 supplied by Loan and Debt Management Division and Central Accounts Division, Department of Finance, Government of Newfoundland and Labrador.

Definitions and Explanations:

This information was extracted from the Balance Sheet of the Province, the Statement of Contingent Liabilities, and the balance sheets of wholly owned Crown Corporations. The format used closely resembles that presented by A. E. Ames and Company in placement memorandum.

Population data as of June 1 of each year following the close of the fiscal year was used in calculating per capita data.

---

[1] Subject to Audit.

[2] Includes $3,383,000 due on Public Buildings.

[3] Includes amounts from the proceeds of the sale by Newfoundland Municipal Financing Corporation of its 7% Sinking Fund Debentures due 1987 which have been advanced to the Province.

SECTION H

BANKING AND FINANCE

SECTION H

BANKING AND FINANCE

H- 1. **Cheques Cashed in Clearing Centres, St. John's, By Month, 1949 to 1969**

Source: D.B.S. **Cheques Cashed in Clearing Centres**, 61-201, 1965 to 1967, (table 5); **Cheques Cashed in Clearing Centres**, 61-001, (monthly), 1968 and 1969, (table 3); Data for 1949 to 1963 supplied by D.B.S., Business Finance Division.

Definitions and Explanations:

"Cheques Cashed in Clearing Centres" are mainly restricted to those amounts debited by the banks to accounts of customers, either current or savings. Cheques which the banks draw on themselves or on the Bank of Canada are not included. Also not included are settlements for clearings and foreign exchange transactions between the banks.

H- 2. **Summary of Insurance Statistics, Newfoundland and Labrador, 1957 to 1967**

Source: **Annual Report of the Superintendent of Insurance**, Department of Provincial Affairs, Government of Newfoundland and Labrador, 1957 to 1967.

Definitions and Explanations:

Net Premiums written is the portion of the total premium calculated on the basis of a particular mortality table and interest rate, to enable the insurer to pay benefits as provided by the insurance contract, no account being taken of expenses, contingencies, or profit.

. Net Claims incurred are claims paid to policy holders under an insurance contract but does not include claims paid under reinsurance ceded to other companies.

H- 3. **Number of Taxpayers, Total Income, Total Tax, Newfoundland and Labrador, By Income Classes, 1949 to 1967**

Source: **Taxation Statistics**, Department of National Revenue, 1949 and 1950, (table G); 1951 to 1962, (table 7); 1963 to 1967, (table 8).

Definitions and Explanations:

The data presented in this table and in the remaining tables of this section dealing with individuals are based upon a stratified random sample of Individual Income Tax Returns undertaken annually by the Department of National Revenue in Ottawa. In the aggregate, this sample is approximately 6% of the total number of returns and has been found to be accurate in overall results. However, the degree of accuracy is not as great when detailed breakdowns are attempted even though heavier sampling ratios were used in sparse areas and classifications in an attempt to strengthen these groups.

H- 4. **Taxable Returns, Sources of Income, Allowable Deductions and Total Tax Payable, Newfoundland and Labrador, 1950 to 1967**

Source: **Taxable Statistics**, Department of National Revenue, 1950, (table D); 1951 to 1962, (table 4); 1963 to 1967, (table 5).

Definitions and Explanations:

See H-3.

H- 5. **Selected Statistics of Taxable and Non-Taxable Returns of Individuals, Newfoundland and Labrador, By Census Division, 1957 to 1967**

Source: **Taxation Statistics**, Department of National Revenue, 1957 to 1962, (table 5); 1963 to 1967, (table 6).

Definitions and Explanations:

See H-3 and Map I.

H- 6. **Selected Statistics of Non-Taxable Returns of Individuals, Newfoundland and Labrador, By Census Division, 1957 to 1967**

Source: **Taxation Statistics**, Department of National Revenue, 1957 to 1962, (table 5); 1963 to 1967, (table 6).

Definitions and Explanations:

See H-3 and Map I.

H- 7. **Selected Statistics of Taxable Returns of Individuals, Newfoundland and Labrador, By Census Division, 1957 to 1967**

Source: **Taxation Statistics**, Department of National Revenue, 1957 to 1962, (table 5); 1963 to 1967, (table 6).

Definitions and Explanations:

See H-3 and Map I.

H- 8. **Number of Taxpayers, Total Income, and Total Tax, Newfoundland and Labrador, By Occupational Classes, 1949 to 1967**

Source: Taxation Statistics, Department of National Revenue, **1949** and **1950,** (table H); **1951** to **1962.** (table 8); **1963** to **1967,** (table 9).

Definitions and Explanations:

See H-3.

H- 9. **Selected Statistics of Taxation Returns of Individuals, Corner Brook, 1956 to 1967**

Source: Taxation Statistics, Department of National Revenue, **1956** to **1962,** (table 4); **1963** to **1967.** (table 5).

Definitions and Explanations:

See H-3.

H-10. **Selected Statistics of Taxation Returns of Individuals, St. John's, 1949 to 1967**

Source: Taxation Statistics, Department of Revenue, **1949** and **1950,** (table D); **1951** to **1962,** (table 4); **1963** to **1967,** (table 5).

Definitions and Explanations:

See H-3.

H-11. **Distribution of Taxable Corporation Income, Newfoundland and Labrador, By Industry, 1957 to 1967**

Source: Taxation Statistics, Department of National Revenue, **1957** to **1964,** (table 7); D.B.S. **Corporation Statistics,** 61-208, **1965** to **1967,** (table 3).

Definitions and Explanations:

The industrial groupings for the years 1965, 1966 and 1967 differ somewhat from that of 1964 and earlier years. D.B.S. commenced publications of these statistics in 1965 and has based the industry classification upon the Standard Industrial Classification. Prior to 1965 a somewhat different classification was used by the Department of National Revenue. Therefore, the statistics presented in this table for the years 1965 to 1967 are not completely comparable with earlier years.

The sampling basis used for this data was 100 percent of all corporations with $5 million or more in assets, 50 per cent of those corporations with assets from $1 million to $5 million, and 5 percent of those corporations with less than $1 million in assets.

SECTION I

PRICE INDEXES

SECTION I

PRICE INDEXES

I- 1. **Total and Main Components of the Consumer Price Index, St. John's, By Month, 1951 to 1969**
Source: D.B.S. **Prices and Price Indices** 62-002, (table 11), **January, 1969** to **October, 1969** and Data Supplied By D.B.S., Prices Division.

Definitions and Explanations:

The present Consumer Price Index is based on 1961=100 and D.B.S. commenced publishing on this new base in January 1969. This new base replaces that of June 1951 = 100 which had been in effect since the Index was first tabulated in this Province. The present index may be converted to the old base by multiplying the data presented by the following conversion factors: All Items, 1.167; Food 1.113; Housing, 1.130; Clothing, 1.106; Transportation, 1.224; Health and Personal Care, 1.541; Recreation and Reading, 1.509; Tobacco and Alcohol, 0.984.

The Consumer Price Index is based on a sample survey of a given basket of commodities in St. John's and most items are covered on a monthly basis. Each item is then weighed according to a predetermined weighting system and tabulated to form part of the monthly index. Beginning in February 1962, the items included and their relative weights were based on a revision made by D.B.S. in 1957. Prior to this the index was based on weights established by D.B.S. in 1947-1948.

A variety of products are surveyed under each major category, mostly on a monthly basis. There are, approximately 90 items surveyed under Food with the major sub-categories being Restaurant Meals, Dairy Products, Cereal Products, Fats and Oils, Eggs, Meats, Fish and Poultry, Fruits and Vegetables, and Miscellaneous Groceries. Under Housing there are some 58 items with the main sub-categories being Rent, Home Ownership, Fuel and Lighting, Furniture, Appliances, Floor Coverings. Textiles, Utensils and Equipment, Supplies, and Services. In Clothing there are also approximately 58 items covered with the sub-categories being Men's Wear, Women's Wear, Children's Wear, Footwear, Piece Goods, Clothing Services, and Jewellery. Transportation is composed of about 16 items under three sub-headings; Automobile Operation, Local Transportation, and Travel. In the Health and Personal Care category there are approximately 29 items surveyed with the following sub-groups: Doctor, Dentist, Optical Care, Prepaid Medical Care, Pharmaceuticals, Supplies, and Services. Under Recreation and Reading there are 14 items covered and finally under Tobacco and Alcohol there are 4 items surveyed.

In the total index Food and Housing are given the greatest weight followed by Clothing, Transportation, Tobacco & Alcohol, Health & Personal Care, and Recreation & Reading.

SECTION J

AGRICULTURE

SECTION J

AGRICULTURE

J- 1. **Number and Area of Census Farms and Commercial Farms, Newfoundland and Labrador, By Census Division, 1961 and 1966**

Source: D.B.S. Census of Canada, 1966 Special Bulletin, Agriculture, 96-631, (table 3).

Definitions and Explanations:

Census Farms:

A census farm is defined as an agricultural holding of one acre or more with sales of agricultural products, during the 12-month period prior to the census, of $50 or more.

Commercial Farms:

A commercial farm is defined as a census-farm with values of sales of agricultural products, during the 12-month period prior to the census, of $2,500 or more (excluding "institutional farms", etc.).

It should be noted that variations in agricultural production and prices of agricultural products affect the number of commercial farms. Between 1960 and 1965 the farm index of prices of agricultural products for Canada increased from 250.0 to 282.1.

Census Division:

See Map I.

J- 2. **Selected Statistics of Census Farms, Newfoundland and Labrador, For Census Years 1951 to 1966**

Source: D.B.S. Census of Canada, 1966, Agriculture Newfoundland, Volume III (3.2), June 1968, 96-602, (table 2), Page 2-1.

Definitions and Explanations:

Census Farms:

See Table J-1.

Farm-Population:

All persons living in a dwelling situated on a census farm as defined in the census, were considered to be farm population, regardless of their occupation. In the case of institutions located on a census farm, only the manager hired agricultural workers and members of their households were included with this population.

Census Farm Areas:

Crown lands, usually pasture land, which were operated under a lease arrangement with Federal, Provincial or Municipal governments are reported as part of the farming operation of the person to whom the land was leased. However, land which was used under a per head grazing permit or fee is not included.

Large areas of timber land or other non-agricultural land held by a census farm operator, but operated apart from the farm business, are excluded.

Operator:

This term is used in the Census of Agriculture to designate the person who is directly responsible for the agricultural operation of the holding, whether as owner, tenant or hired manager. As only one operator is listed for each census farm, the number of operators is the same as the number of census farms. If, for example, the holding was operated as a partnership, only one partner was considered to be the operator.

Tenure of Operator:

Agricultural holdings are classified by tenure depending on whether the operator owns, rents or manages the census farm. A fully owned holding means the operator holds the title or deed to all the land he operates, or has a purchase agreement for same. It does not necessarily mean that the property is free of debt. The term "partly owned-partly rented" refers to instances where the operator owns only part of the land he operates and rents or leases the remainder. When the operator manages the whole census farm for someone else, it is classed as managed.

If the holding is only partly managed, then for tenure purposes, the managed portion is considered to be owned. For example, a census farm, which is partly managed and partly rented, is classed as partly owned-partly rented.

Leased land is included with rented land.

Use of Land:

All census farm land is classified according to use, with each acre included in only one of the categories:

Improved land—The area of improved land consists of the total of the areas reported for the four land categories listed below, namely, area under crops, improved pasture, summer fallow, and other improved land.

Area under crops–Included in this item is the total area of cropland sown or to be sown for harvest. It is the total area of all field crops, and fruits, vegetables, nursery and greenhouse products. Because some crops are reported in fractions of an acre there may be slight differences between the sum of the individual crop acreages and the total cropland. Where intercropping or double cropping is practised, the land area was to be reported only once in the category "area under crops", but the areas of each crop were included with the individual crop acreages.

Improved Pasture–All land which has been cultivated and seeded to pasture and was used for grazing is included in this item. Natural prairie or hay land that was pastured after the crop had been removed is not included.

Summer Fallow--Land from which no crop was to be harvested but which was to be cultivated, or worked during the year for weed control and/or for moisture conservation is included in this category. Areas which were sown to a crop with the intention of ploughing the crop under as green manure were enumerated as summer fallow, but land ploughed or cultivated in the summer after a crop (such as hay or fall rye) had been harvested, was to be enumerated as cropland.

Other improved land–This item includes the area of barnyards, home gardens, lanes and roads on census farms. It also includes areas of cultivated land that were lying idle, being neither summer-fallowed nor cropped, and areas of new breaking that had not been seeded to a crop. Acreages from which sod is being sold for lawn sodding purposes are also included in this item.

Woodland--This includes census farm woodlots, land leased for cutting, sugar bush and cutover land with young growth which has or will have value as timber, fuelwood or Christmas trees. The area of trees planted for windbreakers was also to be included. It excludes large timber tracts which are run as a separate business from the census farm.

Other unimproved land–Areas of natural pasture or hay land that had not been cultivated, brush pasture, grazing or waste land, slough, marsh and rocky land, etc., are all included in this item.

Total Capital Value:

This is the value of census farm capital: land and buildings, machinery and equipment (including automobiles), livestock and poultry. Census farm operators were asked to give a value for land and buildings, farm machinery and equipment on their holding regardless of ownership. The value reported was to be an estimate of the market value, not the original, replacement or assessed value.

The value of land and buildings was to be the value of the property when being used for agricultural purposes. For areas surrounding cities or towns, the real estate value (for subdivision, industrial, or other non-agricultural purposes) of the census farm property was not to be reported.

The value to be reported for farm machinery was the present market value–that is, the amount for which the machinery and equipment would sell if there was a willing buyer and a willing seller, and not a forced sale. It might be explained as the price the machine would likely bring, in its present condition, at an auction sale or the amount the operator would be willing to pay for the machine if he was buying one of the same make, age and condition. The original value or replacement value was not to be reported unless it conformed with the market value.

The total value of machinery and equipment includes the value of items not reported separately as well as the value of the machines which are reported separately.

Values for the livestock and poultry reported in the census were compiled from data on average farm values for the various types of livestock and poultry obtained by the Agriculture Division of the Dominion Bureau of Statistics in a special sample survey.

Machinery and equipment – The number and value was to be reported for agricultural machines on the holding at the census date, regardless of whether the machines were owned by the operator or someone else. Old machines no longer being used were not to be reported. Equipment owned in partnership was to be reported on the census farm where it was located.

J- 5. Commercial Farms, Newfoundland and Labrador, By Type, 1961 and 1966

Source: D.B.S. **Census of Canada, 1966, Agriculture,** Newfoundland, 96-602, (table 3).

Definitions and Explanations:

Commercial Farms:

See Table J-1.

Type of Farm:

Dairy:

51.0 per cent or more of the total sales of agricultural products obtained from dairy products; or

40.0 to 50.9 per cent of total sales of agricultural products obtained from dairy products, provided that the sale of dairy products together with the sale of cattle and calves amount to 51.0 per cent or more of total sales of agricultural products.

Cattle, hogs, sheep (excluding farms qualifying as dairy):

51.0 per cent or more of total sales of agricultural products obtained from the sale of cattle, hogs and sheep (including wool).

Poultry:

51.0 per cent or more of total sales of agricultural products obtained from the sale of poultry and poultry products.

Field crops, other than small grains:

51.0 per cent or more of total sales of agricultural products obtained from the sale of field crops, other than grains. Crops included are hay and forage crops (including forage crop seed), potatoes, sugar beets, other roots, tobacco and field crops not elsewhere specified.

Fruits and vegetables:

51.0 per cent or more of total sales of agricultural products obtained from the sale of fruits and vegetables (including vegetable seed, but excluding potatoes and turnips).

Forestry:

51.0 per cent or more of total sales of agricultural products obtained from the sale of forest products. Maple products are not included.

Miscellaneous specialty:

51.0 per cent or more of total sales of agricultural products obtained from any one of the groups of products listed below:

fur-bearing animals and pelts;
honey and beeswax;
maple products;
nursery and greenhouse products;
horses;
other agricultural products such as goats and goat milk.

Mixed:

Livestock combination – 51.0 per cent or more of the total sales of agricultural products obtained from the sale of livestock and livestock products. Items included are those included in the specialty group of dairy, cattle, hogs, sheep, and poultry.

Field crops combination — 51.0 per cent or more of the total sales of agricultural products obtained from the sale of all field crops. Items included are those included in the specialty groups of wheat; small grains; and fieldcrops, other than small grains.

Other combinations – This is a residual group and includes all farms not qualifying for any of the above types.

J- 6. **Census Farms, Newfoundland and Labrador, By Acreage, For Census Years 1951, 1956, 1961 and 1966**

Definitions and Explanations:

See J-1 and J-2.

J- 7. **Livestock and Poultry on Census Farms, Newfoundland and Labrador, For Census Years 1951, 1956, 1961 and 1966**

Source: D.B.S. **Census of Canada, 1966, Agriculture, Newfoundland,** 96-602, (table 8).

Definitions and Explanations:

See J-1.

J- 8. **Value of Major Agricultural Products Sold By Census Farms, Newfoundland and Labrador, By Region, 1950, 1960 and 1965**

Source: Derived from D.B.S. **Census of Canada, 1951, Volume VI, Part 1,** (table 28), **1961 Agriculture, Newfoundland, Volume V, Part 1,** 96-531, (table 20), **1966 Agriculture, Newfoundland, Volume III** (3.2), **June 1968,** 96-602, (table 23).

Definitions and Explanations:

See J-1 and J-4.

Value of agricultural products sold:

Includes the value of sales of all agricultural products sold from each census farm including products traded or exchanged, whether received by the operator or some other person. For tenant-operated farms, the landlord's share of products sold is included. Products of an institutional farm used by the institution were considered sold.

Agricultural sales are reported for the preceding calendar year or for the 12-month period ending May 31 of the census year.

When no sales data were reported, such as in the case of crop failure or census farms operated for the first time in the census year 1966, an estimate of sales was usually made based on reported crop and livestock inventories.

SECTION K

FISHERIES

SECTION K

FISHERIES

SEA FISHERIES AREAS OF NEWFOUNDLAND AND LABRADOR

The Dominion Bureau of Statistics has divided the Province of Newfoundland and Labrador into 15 geographic areas for the purpose of reporting fishery statistics. These areas are described below in terms of the communities included in each area.

See Map 2.

Area

A. Cape Norman inclusive to Cape St. John exclusive.

B. Cape St. John inclusive to Cape Freels inclusive.

C. Cape Freels exclusive to Cape Bonavista exclusive.

D. Cape Bonavista inclusive to Grate's Point exclusive.

E. Grate's Point inclusive to Cape St. Francis exclusive.

F. Cape St. Francis inclusive to Cape Race exclusive.

G. Cape Race inclusive to Cape St. Mary's exclusive.

H. Cape St. Mary's inclusive to Point Crewe exclusive.

I. Point Crewe inclusive to Pass Island inclusive.

J. Pass Island exclusive to Cape Ray inclusive.

K. Cape Ray exclusive to Cape St. George exclusive.

L. Cape St. George inclusive to Cape St. Gregory exclusive.

M. Cape St. Gregory inclusive to Pointe Riche inclusive.

N. Point Riche exclusive to Cape Norman exclusive.

O. Point St. Charles inclusive to Hopedale inclusive.

K- 1. Quantity of Fish Landings, Newfoundland and Labrador, By Species, 1952 to 1968

Source: D.B.S. Fisheries Statistics, Newfoundland, 24-202, 1956 to 1967, (table 2); D.B.S. Fisheries Statistics of Canada, 24-201, 1953 and 1954, (table 2).

Definitions and Explanations:

Conversion factors used to convert landings to the common landed form as shown in this table are as follows:

Cod, haddock, pollock and catfish:	
To gutted head-on from round	.82
To gutted head-on from gutted head-off	1.219512
To gutted head-on from split	1.45
To gutted head-on from salt bulk light salted	2.0
To gutted head-on from salt bulk heavy salted	2.2
Halibut:	
To gutted head-on from gutted head-off	1.05
Tuna and Swordfish:	
To gutted head-on from round	.74
Salmon and Redfish:	
To round from gutted headed-on	1.1
To round from gutted head-off	1.2
Scallops:	
To shucked from in shell	.125

K- 2. Value of Fish Landings, Newfoundland and Labrador, By Species, 1952 to 1968

Source: D.B.S. Fisheries Statistics, Newfoundland, 24-202, 1956 to 1967, (table 2); D.B.S. Fisheries Statistics of Canada, 24-201, 1953 and 1954, (table 2); Data for 1968 supplied by the Economics Branch, Federal Department of Fisheries, St. John's, Newfoundland.

K- 3. Quantity of Fish Products, Newfoundland and Labrador, By Type, 1956 to 1968

Source: D.B.S. Fisheries Statistics, Newfoundland, 24-202, 1957 and 1958, (table 4); 1959 to 1967, (table 3); Data for 1968 supplied by the Economics Branch, Federal Department of Fisheries St. John's, Newfoundland.

K-4. Value of Fish Products, Newfoundland and Labrador, By Type, 1956 to 1968

Source: D.B.S. Fisheries Statistics, Newfoundland, 24-202, 1957 and 1958, (table 4); 1956 to 1967, (table 3); Data for 1968 supplied by Economics Branch, Federal Department of Fisheries, St. John's, Newfoundland.

K- 5. Capital Equipment Employed in Primary Fishing Operations, Newfoundland and Labrador, By Type, 1954 to 1968

Source: D.B.S. Fisheries Statistics, Newfoundland, 24-202, 1956 to 1967, (table 4); D.B.S. Fisheries Statistics of Canada, 24-201, 1954, (table 4); Data for 1968 supplied by Economics Branch Federal Department of Fisheries, St. John's, Newfoundland.

K- 6. Value of Capital Equipment Employed in Primary Fishing Operations, Newfoundland and Labrador, By Type, 1954 to 1968

Source: D.B.S. Fisheries Statistics, Newfoundland, 24-202, 1956 to 1967, (table 4); D.B.S. Fisheries Statistics of Canada, 24-201, 1954, (table 4); Data for 1968 supplied by Economics Branch, Federal Department of Fisheries, St. John's, Newfoundland.

K- 7. Exports and Value of Salted Cod, Newfoundland and Labrador, 1804 to 1968

Source: Data supplied by Economics Branch, Federal Department of Fisheries, St. John's, Newfoundland.

K- 8. Full-Time Inshore Fisheries Employment, Newfoundland and Labrador, By Area, 1957 to 1968

Source: Data supplied by Economics Branch, Federal Department of Fisheries, St. John's, Newfoundland.

Definitions and Explanations:

Full-time fishermen are defined as those who are engaged in the fishery for over 10 months of the year; part-time as those who are engaged in the fishery for a period of over five and up to 10 months; and casual as those who are engaged in the fishery for less than five months. "Engaged in the fishery" includes, not only time spent in catching fish, but also time spent on shore preparing boats and fishing equipment, processing fish, repairing shore installations, and performing other unpaid activities connected with the fishery; and also time spent receiving unemployment insurance payments if such payments are earned as a result of fishing activities.

K- 9. **Part-Time Inshore Fisheries Employment, Newfoundland and Labrador, By Area, 1956 to 1968**
Source: Data supplied by Economics Branch, Federal Department of Fisheries, St. John's, Newfoundland.
Definitions and Explanations:
See K-8.

K-10. **Casual Inshore Fisheries Employment, Newfoundland and Labrador, By Area, 1962 to 1968**
Source: Data supplied by Economics Branch, Federal Department of Fisheries, St. John's, Newfoundland.
Definitions and Explanations:
See K-8.

K-11. **Full-Time Offshore Fisheries Employment, Newfoundland and Labrador, By Area, 1956 to 1968**
Source: Data supplied by Economics Branch, Federal Department of Fisheries, St. John's, Newfoundland.
Definitions and Explanations:
See K-8.

L- 1. **Principal Statistics of Pulp and Paper Mills, Newfoundland and Labrador, 1949 to 1967**

Source: D.B.S. **Pulp and Paper Mills,** 36-204, **1955,** p. H-7, (table B); **1957,** p. H-7, (table B); **1959,** p. 12, (table 1); **1961,** p. 13, (table 1B); **1963,** p. 5, (table 1A); **1965,** p. 5, (table 1); **1966,** p. 1, (table 1); **Pulp and Paper Mills Preliminary Bulletin, May 1969,** 36-204; Data for 1949 to 1953 and the Number and Wages of Production and Related Workers from 1949 to 1960 supplied by D.B.S., Forestry Statistics Section, Manufacturing and Primary Industries Division.

Definitions and Explanations:

From 1949 to 1956 the statistics are based on the Standard Industrial Classification and "Activity" concept. From 1957 to 1960 the statistics are based on the Revised Standard Industrial Classification and "New Establishment" concept. From 1961 to 1967 the statistics are based on the Revised Standard Industrial Classification and "New Establishment Concept" and total activity concept. Thus from 1961 onward sales and distribution workers and non-manufacturing production workers (new construction by own employees, for example) are included for the first time as a result of the implementation of the total activity concept.

While the revised Standard Industrial Classification has only been in effect since 1961, the data on the "Principal Statistics of Pulp and Paper Mills" has been revised back to 1957 in the 1961 booklet. Prior to 1957 the data is on the original concepts. For a full description of the changes embodied in the Standard Industrial Classification see the explanatory note under "Manufacturing", or consult the **Standard Industrial Classification Manual,** Catalogue No. 12-501.

For the years 1949, 1950, 1951, and 1953 in Table L-1, three establishments are shown. At that time, in addition to the two present pulp and paper mills, a pulp mill was also established at Bishops Falls which pumped the raw pulp overland from Bishops Falls to the mill in Grand Falls.

The man-hours of production and related workers in manufacturing activity represent total man-hours paid (total hours at work during the calendar year plus hours not worked but nevertheless paid for, such as paid vacations, sick leave, statutory holidays, etc.).

For further definitions and explanations see N-1.

L- 2. **Principal Statistics of Sawmills and Planing Mills, Newfoundland Labrador, 1957 to 1967**

Source: D.B.S. **Manufacturing Industries of Canada,** 31,204, **1962, 1964** and **1965,** (Subsection 2). Data for 1966 and 1967 supplied by D.B.S., Manufacturing and Primary Industries Division.

Definitions and Explanations:

See L-1, N-1 and N-7.

Note that the statistics on planing mills are only included from 1962 onward. From 1957 to 1961 the Principal Statistics only include sawmill statistics.

Working owners and partners are not being included in the statistics of employees and salaries and wages. There may be some duplication in numbers when a person owns more than one establishment and is reported as a working owner on each census return.

Withdrawals of working owners are defined as amounts withdrawn by owners or partners for normal living expenses excluding withdrawals for payment of income tax.

L- 3. **Principal Statistics of the Logging Industry, Newfoundland and Labrador, 1963 to 1967**

Source: D.B.S. **Logging,** 25-201, **1965,** p. 12, (table 1A); **1966** and **1967,** p. 5, (table 1).

Definitions and Explanations:

See L-1, L-2 and N-1.

A logging establishment is a unit which is engaged in logging and related activities (such as felling, bucking, skidding, hauling, trucking, booming, towing, etc.). In most cases the establishment coincides with the firm. However, firms that have more than one establishment are requested to submit a separate census of logging report for each logging establishment which can meet the reporting requirements under the definition of an "establishment".

The number of establishments represents the number of operating units that are principally engaged in logging activities. These units do not represent the total number engaged in logging operations. Numerous logging operations are conducted by establishments classified to other industries (e.g., the sawmill industry) and by farmers and other individuals.

Employees:

The average number of production and related workers engaged in logging is calculated by dividing the reported number of man-days paid during the year by 270. The number of man-hours paid is calculated on the basis of 9 hours per day. It should be noted that the division of hours paid into production and related workers payrolls results in average hourly earnings and does not represent hourly wage rates which are collected and published by the Department of Labour and which are based on selected occupations.

The value added by logging does not coincide with the value added shown in table F-4 because of the difference in the treatment of stumpage. In this table stumpage is treated as an input for the purchase of raw materials (standing timber), whereas, in F-4 stumpage is treated as a tax and is not extracted.

L- 4. **Estimated Forest Production, Newfoundland and Labrador, By Product, 1949 to 1967**

Source: D.B.S. **Logging**, 25-201, **1965**, p. 24, (table 14); **1966**, p. 17, (table 14).

Definitions and Explanations:

To convert the quantity reported or estimated into a common denominator the following formulas are used:

Product	**Conversion Factors** Equivalent Volume in Cu. Ft.
Logs and bolts (thousands of board feet)	200
Pulpwood (rough cords)	85
Fuelwood (cords)	80
Round mining timber (cords)	85
Fence posts (number)	1.2
Fence rails (number)	1

L- 5. **Pulp and Paper Mills, Employment and Payrolls, Newfoundland and Labrador, 1961 to 1967**

Source: D.B.S. **Pulp and Paper Mills**, 36-204, **1962**, p. 13, (table 2); **1963-1964**, p. 11, (table 8); **1965-1966**, p. 7, (table 8); D.B.S. **Pulp and Paper Mills Preliminary Bulletin, May 1969**, 36-204-P, Data for 1961 supplied by D.B.S., Forestry Statistics Section, Manufacturing and Primary Industries Division.

Definitions and Explanations:

Production and Related Workers In Manufacturing Activity:

Production and related workers in manufacturing activities include those engaged in production and assembling activities, and employees engaged in maintenance, repair, janitorial and watchmen services and line supervisors (working foremen) engaged in similar work to that of the employees they supervise. Production and related workers engaged in manufacturing activity are reported as those receiving pay during the last pay period of each month, an average for the year being obtained by summing the monthly figures and dividing by 12. This procedure is followed even though the establishment did not operate in all months in order to arrive at equivalent annual full-time employment.

The man-hours of production and related workers in manufacturing activity represents total man-hours paid. This includes total hours at work during the calendar year, plus hours not worked but nevertheless paid for, such as paid vacations, sick leave, statutory holidays, etc.

It should be noted that the division of hours paid into production and related workers' payrolls, results in average hourly earnings and does not represent hourly wage rates which are collected and published by the Department of Labour and which are based on selected occupations.

Other:

Other production and related workers refer to employees on manufacturing establishments' payrolls engaged in activities such as construction undertaken for the use of these establishments, some outside piece-workers employed in certain industries, logging employees who are reported as part of the manufacturing establishment and any other production workers who are not engaged in manufacturing-type operations.

Administrative and Office Employees:

Administrative and office employees includes all executive and supervisory officials such as presidents, vice-presidents, comptrollers, secretaries, treasurers, etc., together with managers, professional, technical and research employees, superintendents and factory supervisors above the line supervisor or working foreman level, and clerical staffs. Also included are employees in activities such as advertising, credit collections, purchasing, personnel, legal, medical, etc.

Sales and Distribution:

Sales and distribution workers include office personnel whose salaries are charged to selling expenses, travelling salesmen, driver salesmen, delivery truckdrivers and their helpers, etc. It may also include some sales employees who are reported as part of a manufacturing establishment but are not working at the establishment's location. The figures exclude persons working on a commission basis who are not considered regular employees of the establishment.

Total Employees:

Total employees include all employees in the above categories including employees located at separately situated head offices and auxiliary units.

Salaries and Wages:

Salaries and wages refer to gross earnings of employees before deductions for income tax and employees contributions to social services such as sickness, accident, and unemployment insurance, pensions, etc. They include all salaries, wages, bonuses, and profits shared with employees, the value of room and board where provided, commissions (paid to regular employees only) as well as any other allowance forming part of the worker's earnings. Payments for overtime are included .

Source: D.B.S. **Sawmills and Planing** Mills, 35-204, **1952,** p. A-22, (table 6); **1953-1955,** p. A-22, (table 7); **1957,** p. A-26, (table 7); **1959,** p. 18, (table 7); **1960,** p. 16, (table 3); **1961,** p. 25, (table 4); **1963,** p. 26, (table 8A); **1965-1966,** p. 22, (table 14); Data for 1949, 1950 and 1967 supplied by D.B.S., Forestry Statistics Section, Manufacturing and Primary Industries Division.

L- 7. **Tenure of Productive Forest Lands, Newfoundland and Labrador, 1959 to 1963**

Source: D.B.S. **Canadian Forestry Statistics,** 25-202: **1959,** p. 7, (table 2); **1961,** p. 7, (table 2); **1963/64.** p. 6, (table 2).

L- 8. **Value of Pulp and Paper Exports, Newfoundland and Labrador, By Type, 1953 to 1968**

Source: A.D.B. Report, **Forestry in the Atlantic Provinces, 1953 to 1965,** (table 4-21). The data for 1966 to 1968 was supplied by the Newfoundland Forest Service.

L- 9. **Number of Sawmills Licenced and Sawmill Production, Newfoundland and Labrador, 1934 to 1968**

Source: Data supplied by Newfoundland Forest Service.

Definitions and Explanations:

This table is not comparable with table L-2. Table L-2 shows only those establishments primarily engaged in sawing and planing lumber and those producing ties, spoolwood, lath and other mill products. This table shows the record of all licences issued, and the amount of lumber produced. Anyone who cuts lumber in Newfoundland is required to have a licence. Many of the people who produce lumber use it for their own purposes, or sell it privately, and therefore, do not come under the classification of an "establishment". Thus the number of sawmill licences issued is much greater than the number of establishments shown in Table L-2.

L-10. **Selected Forestry Revenue, Government of Newfoundland and Labrador, Fiscal Years 1961-62 to 1968-69.**

Source: Data supplied by Newfoundland Forestry Service.

SECTION N

MANUFACTURING

SECTION N

MANUFACTURING

N- 1. **Selected Statistics, All Manufacturing Industries, Newfoundland and Labrador, 1957 to 1967**

Source: D.B.S. **Manufacturing Industries of Canada, 31-204, 1962, 1964 and 1965,** (subsection 2); Data for 1966 and 1967 supplied by D.B.S., Manufacturing and Primary Industries Division.

Definitions and Explanations:

D.B.S. provides the following explanation of concepts and definitions concerning manufacturing industries.

General:

The Census of Manufactures is an annual mail survey covering Canada's Manufacturing Industries. It is based on the Standard Classification of Industries and full details concerning the system may be found in the **Standard Industrial Classification Manual,** Catalogue No. 12-501 which is available from the Queen's Printer or the Dominion Bureau of Statistics. In summary, the Classification as it relates to the manufacturing industries provides for a breakdown into 140 industries arranged in 20 major industry groups. Of the 140 (3 digit) industries, 18 are further broken down into 56 (4 digit) sub-classes. They cannot all be published separately by province, however, because of the confidential nature of the data in certain provinces.

The reporting unit for the Census is designated as the establishment (see definition of "Establishment" in following section) and a return is requested from every establishment classified to a manufacturing industry. Although respondents are required to submit reports covering the calendar year, financial year reports other than the calendar year are accepted in instances where respondents find it impossible to supply calendar year data from accounting records. When an establishment is operated for only part of a year a report is required covering the period of operation.

Since 1960 the following major changes have been implemented in the Census of Manufactures: (a) a revised Standard Industrial Classification (b) a new establishment definition and (c) an extension of the establishment definition to cover the non-manufacturing activities of manufacturing establishments. For a complete description of the procedures followed in establishing the revised series, reference should be made to the Explanatory Notes included in the 1960, 1961 and 1962 industry publications. The statistical framework within which the Census of Manufactures is now carried out is based on the following concepts and definitions which have been developed as part of a general programme to achieve a fully integrated system of economic statistics.

Establishments:

A manufacturing establishment is typically a factory, mill or plant principally engaged in manufacturing activities. The majority of such establishments are firms but many firms have more than one establishment. Such firms are requested to submit a separate Census of Manufactures report for each manufacturing establishment which can meet the reporting requirements embodied in the following definition of the "Establishment":

"The smallest unit which is a separate operating entity capable of reporting the following principal statistics:

Materials and supplies used
Goods purchased for resale as such
Fuel and power consumed
Number of employees and salaries and wages
Man-hours worked and paid
Inventories
Shipments or sales"

Each establishment is required to report on all the activities carried out within its accounting boundaries (except income from investments such as rent, interest and dividends) and data on the different activities (manufacturing, trading in goods not of own manufacture, construction by own labour force, revenue from services, etc.) are requested to be reported separately. It should be noted that the statistics for separate activities are not completely consistent since some respondents cannot distinguish in their records, materials, shipments and inventories relating solely to their own manufacturing activities. For example, inventory of goods purchased for resale may not be distinguishable from inventory of own manufactured goods. Complete consistency, therefore, can be obtained only at the "all operations" (total activity) level and for studies or statistical measures requiring accurate coordinated data, the "total" statistics should be used.

The number of establishments represents the number of operating units that are principally engaged in the activities of the manufacturing industries to which they have been classified. These units do not necessarily represent the total number engaged in the production of a commodity mainly produced in a certain industry. Some commodities are produced as secondary products in other manufacturing and non-manufacturing industries. It should be noted that head offices and auxiliary units which are surveyed separately are not included in the establishment count, (see following notes on head offices and auxiliary units).

Employees:

(a) Production and related workers—Manufacturing activities

In addition to those engaged in production and assembling activities, they include those employed in storing, inspecting, handling, packing, warehousing, etc. They also include employees engaged in maintenance, repair, janitorial and watchman services and line supervisors (working foremen) engaged in similar work to that of the employees they supervise.

(b) Production and related workers—Non-manufacturing activities

Such employees include those on manufacturing establishments' payrolls engaged in activities such as construction undertaken for the use of these establishments, some outside piece-workers employed in certain industries, logging employees who are reported as part of a sawmilling establishment and any other production workers who are not engaged in manufacturing-type operations.

(c) Administrative and office employees

This category includes all executive and supervisory officials such as presidents, vice-presidents, comptrollers, secretaries, treasurers, etc., together with managers, professional, technical and research employees, superintendents and factory supervisors above the line supervisor or working foreman level, and clerical staffs. Also included are employees in activities such as advertising, credit collections, purchasing, personnel, legal, medical, etc. It should be noted that prior to 1961 this category also included working owners and partners. Also included in this category are employees located at head offices or auxiliary units separately located from the establishment; these are generally included in the figures for the province in which they are located.

(d) Sales and distribution workers

This category includes office personnel whose salaries are charged to selling expense, travelling salesmen, driver salesmen, truckdrivers and their helpers, etc. It may also include some sales employees who are reported as part of a manufacturing establishment but are not working at the establishment's location. These are generally broken down by province in cases where more than 15 employees are involved in any one province. The figures exclude persons working on a commission basis who are not considered regular employees of the establishment.

(e) Total employees

This total comprises the foregoing categories including employees located at separately located head offices and auxiliary units. The numbers of employees included under categories (b), (c), and (d) are reported in the form of annual averages and represent as closely as possible full time employment, adjustments are made when reported figures indicate the existence of part time or seasonal employment. In all the above categories, figures on employment refer to the calendar year whether or not other establishment statistics can only be reported on a fiscal year other than the calendar year.

Salaries and Wages:

Salaries and wages refer to gross earnings of employees before deductions for income tax and employees contributions to social services such as sickness, accident and unemployment insurance, pensions, etc. They include all salaries, wages, bonuses, profits shared with employees, the value of room and board where provided, commissions (paid to regular employees only) as well as any other allowance forming part of the worker's earnings. Payments for overtime are included. Figures on salaries and wages refer to the calendar year.

Fuel and Electricity:

Figures for fuel refer to amounts actually used (including fuel used in cars, trucks, locomotives, etc.) not to purchases unless the quantities are substantially the same. Any fuel and electricity produced by establishments for internal consumption are not included in the total cost. Values represent laid down cost at the establishment including freight, duty, etc. Although fuel and electricity used is considered part of manufacturing activity it should be noted that it also includes relatively small amounts used in non-manufacturing activities since these cannot be reported separately.

Materials and Supplies:

(a) Manufacturing activities

Figures represent quantities and laid down cost values, at the establishment, of materials, supplies and purchased components owned and used during the year in manufacturing activities and related processes. These statistics represent only commodity items or physical goods (cost of services or overhead charges such as advertising, insurance, depreciation, etc. are not included) whether purchased from others or received as transfers (in the form of materials, components or semi-processed goods) from other establishments of the reporting company. Included are maintenance and repair supplies not chargeable to fixed assets accounts and any amounts charged by other establishments for work done on materials owned by the reporting establishment. Cost of repairs or maintenance done by outside contractors and cost of returnable containers are not included.

(b) Non-Manufacturing activities

1. Purchases for re-sale as such

Figures represent cost of materials or products purchased from others by the reporting establishment (or received as transfers from other establishments of the reporting company) for re-sale as such in the same condition as purchased. Included are any finished products received on consignment from other countries.

2. Other materials and supplies used

Figures represent the cost of materials and supplies, if any, used in new construction and in the production of machinery and equipment (for the use of the reporting establishment) by the establishment's own employees. Included are materials used for any capital repairs and alterations carried out by the establishment's employees. Amounts paid to outside contractors for construction and repair work are not included nor is the cost of purchased machinery and equipment. Also included is the cost of office supplies not chargeable to fixed assets accounts and the cost of such other items of materials and supplies used as food, beverages and supplies for establishment-operated cafeterias and lunch counters, first aid and medical supplies, laboratory supplies, etc.

Shipments:

(a) General

The figures represent revenue from all production, sales, services and related activities of reporting establishments with shipments valued in canadian dollars at the point at which the establishment relinquishes control. The unsold portion at year end of consignment shipments in Canada is treated as inventory and not as shipments but all shipments to foreign countries for which the form B13 "Customs Canada Export" has been completed, are treated as shipments.

In those industries where work on principal products extends over a relatively long period, (Fabricated Structural Metal Industry, Aircraft and Parts Manufacturers, Railroad Rolling Stock Industry and Shipbuilding and Repair Industry) the value of production rather than the value of shipments is recorded. There are certain establishments in other industries which also operate on a basis of progress payments. For these establishments, shipments also adjusted to work put in place on the basis of the net change in progress payments over the year.

(b) Shipments of goods of own manufacture

These figures represent shipments of goods made from own materials either in the reporting establishments or by other manufacturers on the basis of a charge to the reporting establishments for work done. Included are revenue from repair and custom work, amounts received in payment for work done on materials owned by other establishments and the cost (book value) of any goods shipped on a rental basis.

All products and byproducts of own manufacture shipped from the establishment are covered, including transfer shipments to sales outlets, distributing warehouses or to other manufacturing plants of the reporting firm, when such units are treated as separate establishments. The value of shipments are net of returned goods, discounts, returns, allowances, sales tax and excise taxes and duties, returnable containers and charges for outward transportation by common or contract carriers. Transportation or delivery expense incurred by the reporting establishment's own carriers are included.

(c) Shipments of goods not of own manufacture

These figures represent the net selling value at establishment (net of discounts, returns, allowances, sales taxes and excise duties and taxes and transportation charges by common or contract carriers) of all products or materials (including products transferred from other establishments of the reporting firm) sold as such in the same condition as purchased or received as transfers. For those industries which ship such goods on a rental basis, the value of shipments represents the book value of these goods. All sales of consignment goods from other countries are included.

(d) Other revenue

Figures represent the book value of fixed assets, if any, (new construction and machinery and equipment including major repairs, alterations, additions, modifications, installation and assembly work) produced during the year for the use of reporting establishment by the establishment's own employees and for which depreciation accounts are maintained. Included also are any revenues from the sale of electricity and from any operations performed by the establishment's own employees, such as revenue from goods produced or purchased for rental (the book value of such goods are included as part of shipments of goods of own manufacture or shipments of goods not of own manufacture), servicing revenues, commissions on sales (when not included in value of sales), revenue for company-operated cafeterias and lunch counters and revenue from outside installation or construction work not related to the establishment's own products, sale of used materials (excluding sale of used fixed assets) research and development work, etc. As mentioned previously the figures do not include non-operating revenue such as rent, dividends, interest, etc.

Value Added:

(a) By manufacturing activities

Figures are compiled by deducting the cost of manufacturing materials, supplies, etc. and fuel and electricity consumed from the value of shipments of goods of own manufacture adjusted for changes in the value of inventories of finished goods and goods in process.

(b) By non-manufacturing activities

The figures are compiled by deducting the cost of goods purchased for re-sale (adjusted for changes in the value of inventories of goods purchased for re-sale) and the cost of non-manufacturing materials and supplies used from the value of shipments of goods not of own manufacture, plus other revenue.

(c) By total activities

The figures consist of value added by manufacturing activities plus value added by non-manufacturing activities. This total value added figure may, in some cases, be less than value added by manufacturing activities as a result of expenditures associated with non-manufacturing exceeding revenues from such activities or because of a decrease in inventory of goods not of own manufacture exceeding the mark-up on the sale of such goods.

N- 2. **Selected Statistics of Manufacturing Industries, Total–Food and Beverage Industries, Newfoundland and Labrador, 1957 to 1967**

Source and Definitions:

See N-1.

The following industries are included in this category:

Meat Products Industries:

Slaughtering and Meat Processors—Establishments primarily engaged in operating abattoirs, meat packing plants, or in manufacturing prepared meats and meat specialities from purchased carcasses. Important products of establishments classified in this industry are fresh meats, cured and smoked meats, fresh and cured sausages, canned meats, and animal oils and fats.

Poultry Processors—Establishments primarily engaged in killing, dressing, packing or canning poultry.

Dairy Products Industries:

Dairy Factories—Establishments primarily engaged in manufacturing natural cheese of all kinds; creamery butter; both butter and cheese; condensed, canned or powdered milk; ice cream, frozen deserts such as sherbets and ices, and ice cream mix; pasteurized and bottled fresh milk. Establishments that pasteurize and bottle milk are included in this industry whether or not they sell the milk at retail.

Process Cheese Manufacturers—Establishments primarily engaged in manufacturing process cheese, cheese pastes and spreads.

Fish Products Industry:

Fish Products Industry—Establishments primarily engaged in canning, filleting, freezing and curing fish, molluscs or crustaceans or producing fish meal or marine oil. Establishments primarily engaged in processing marine vegetable products are included.

Fruit and Vegetable Canners and Preservers:

Fruit and Vegetable Canners and Preservers—Establishments primarily engaged in manufacturing canned and dried fruits and vegetables, fruit and vegetable juices, soups, preserves, jams and jellies, pickles, cider and sauces. Included also are establishments primarily engaged in quick-freezing of fruits and vegetables and processing in SO_2.

Grain Mills:

Feed Manufacturers—Establishments primarily engaged in the production of poultry, turkey, hog, cattle, fur-bearing animal, dog and cat feeds. The feeds contain ground or rolled grains, mill feeds, animal and vegetable proteins, minerals, essential vitamins and antibiotics. Local mixing and custom grinding of grains (feed mills) are included in this industry.

Flour Mills—Establishments primarily engaged in milling flour from grain.

Breakfast Cereal Manufacturers – Establishments primarily engaged in manufacturing prepared breakfast foods such as: corn, wheat and bran flakes; rolled oats; and other cereals either pre-cooked or to be cooked.

Bakery Products Industries:

Biscuit Manufacturers — Establishments primarily engaged in manufacturing biscuits, crackers, pretzels and similar "dry" bakery products including ice cream cones.

Bakeries – Establishments primarily engaged in manufacturing bread, cakes, pastries and similar "perishable" bakery products.

Other Food Processors:

Confectionery Manufacturers – Establishments primarily engaged in manufacturing candies, chocolates, cocoa products, chewing gum and other confectionery such as salted nuts and popcorn.

Sugar Refineries – Establishments primarily engaged in manufacturing cane sugar, beet sugar, sugar syrups, molasses and beet-pulp.

Vegetable Oil Mills – Establishments primarily engaged in manufacturing vegetable oils and their by-products, such as linseed, soybean and cocoanut oil, oilcake meal and linseed meal.

Miscellaneous Food Industries – Establishments primarily engaged in manufacturing baking powder, flavouring extracts and syrups, malt, milled rice, self-rising and blended flours, macaroni and spaghetti, starch and its products jelly powders, yeast, prepared coconut, powdered eggs, frozen eggs, "health foods", peanut butter and other food specialties not elsewhere classified.

Beverage Manufacturers:

Soft Drink Manufacturers — Establishments primarily engaged in manufacturing non-alcoholic beverages and carbonated mineral waters or concentrates and syrups for the manufacture of carbonated beverages.

Distilleries – Establishments primarily engaged in producing alcoholic beverages such as whisky, brandy, rum and gin. This industry includes establishments primarily engaged in manufacturing ethyl alcohol whether or not the alcohol is ultimately used to make potable spirits .

Breweries – Establishments primarily engaged in manufacturing ale, beer, porter, stout and other malt liquors.

Wineries – Establishments primarily engaged in producing wines.

Source and Definitions:

See N-1.

The following industries are included in this category:

Sawmills and Planing Mills: Establishments primarily engaged in sawing lumber (boards, timbers, dimension stock), spoolwood, lath and other mill products such as shingles, cooperage stock and box shook from logs or bolts; in dressing and working lumber to produce standard matched, shiplapped or patterned products.

Sash, Door and Other Millwork Plants: Establishments primarily engaged in manufacturing mill products such as sash, doors, window and door frames, interior woodwork, mouldings, and hardwood flooring. This industry also includes establishments primarily engaged in manufacturing precut or prefabricated wooden buildings or prefabricated panels for buildings or in manufacturing laminated beams and structures.

Veneer and Plywood Mills: Establishments primarily engaged in producing plywood or veneer.

Wooden Box Factories – Establishments primarily engaged in manufacturing wooden boxes, crates fruit and vegetable baskets. This industry includes establishments making box shook from sawn lumber.

Coffin and Casket Industry — Establishments primarily engaged in the manufacture of coffins, caskets and other morticians' supplies.

Miscellaneous Wood Industries – Establishments primarily engaged in wood preservation; in wood turning and in manufacturing wood products not elsewhere classified. Principal products are beekeepers' and poultrymen's supplies, excelsior, woodenware (clothes pins, washboards, stepladders, pails and tub) sanitary woodwork and particle board. Establishments primarily engaged in manufacturing cooperage such as barrels, casks, kegs, and other containers made of staves are included in this industry.

N-9. **Selected Statistics of Manufacturing Industries, Pulp and Paper Mills, Newfoundland and Labrador, 1957 to 1967**

Source and Definitions:

See N-1.

The following industries are included in this category:

Pulp and Paper Mills – This industry includes pulp mills producing chemical or mechanical woodpulp; and combined pulp and paper mills and paper mills manufacturing newsprint, book and writing papers. Kraft paper, paperboard or building and insulation board. Barking mills engaged in producing barked or rossed pulpwood are included in this industry.

N-10. **Selected Statistics of Manufacturing Industries, Total–Printing, Publishing and Allied Industries, Newfoundland and Labrador, 1957 to 1967**

Source and Definitions:

See N-1.

The following industries are included in this category:

Commercial Printing: Establishments primarily engaged in the production of commercial and/or job printing regardless of the printing method or process used (letterpress, including flexographic-planographic or lithographic; intaglio or gravure; stencil printing or silk screen; etc.).

Platemaking, Typesetting and Trade Bindery Plants: Establishments (trade shops) primarily engaged in providing specialized services to the printing and publishing trades, advertising agencies or others: the making of image bearing photographic films, plates and printers dies of all types; doing typesetting; making binders or covers, doing hand or machine bindery work and allied post-printing converting or finishing operations.

Publishing Only: This industry includes establishments primarily engaged in publishing only and which do no printing. The term "publishing", as applied in this industry, includes publishing of books, newspapers, periodicals, almanacs, maps, guides and similar products.

Publishing and Printing: Establishments primarily engaged in publishing and printing newspapers, periodicals, books, almanacs, maps, guides and the like.

N-11. **Selected Statistics of Manufacturing Industries, Commercial Printing Industries, Newfoundland and Labrador, 1957 to 1967**

Source and Definitions:

See N-1 and N-10.

N-12. **Selected Statistics of Manufacturing Industries, Total–Non-Metallic Mineral Products, Newfoundland and Labrador, 1957 to 1967**

Source and Definitions:

See N-1.

The following industries are included in this category:

Cement Manufacturers — Establishment's primarily engaged in manufacturing hydraulic cement, including Portland, natural masonry and pozzolana cements.

Lime Manufacturers – Establishments primarily engaged in manufacturing quicklime, hydrated lime and dead-burned dolomite.

Gypsum Products Manufacturers – Establishments primarily engaged in manufacturing plaster, plaster board and other products composed wholly or chiefly of gypsum.

Concrete Products Manufacturers – Establishments primarily engaged in manufacturing concrete products such as building blocks, brick, sewer pipe, tanks, poles and septic tanks. Establishments primarily engaged in manufacturing sand-lime brick and blocks are included.

Ready-Mix Concrete Manufacturers – Establishments primarily engaged in mixing and delivering ready-mix concrete.

Clay Products Manufacturers – Establishments primarily engaged in manufacturing clay brick, roofing, floor and wall tiles, sewer pipe, and other structural clay products. Establishments primarily engaged in manufacturing clay products such as pottery, chinaware, and porcelain insulators are also included.

Refractories Manufacturers – Establishments primarily engaged in manufacturing fire brick, crucibles and other heat resisting clay products such as glasshouse tank blocks, stoppers, floaters, and rings. This industry also includes establishments primarily engaged in manufacturing non-clay refractories and crucibles.

Stone Products Manufacturers – Establishments primarily engaged in cutting, shaping and finishing stone for building and other purposes. Important products of this industry include monuments and tombstones, dimension stone for buildings, slate blackboards and stone furniture.

Mineral Wool Manufacturers – Establishments primarily engaged in manufacturing mineral wool from materials such as limestone, slag and glass.

Asbestos Products Manufacturers – Establishments primarily engaged in manufacturing asbestos textiles, packings, brake linings, gaskets, asbestos building materials and other commodities composed wholly or chiefly of asbestos.

Glass and Glass Products Manufacturers – Establishments primarily engaged in manufacturing flat glass, plate glass, glass containers, glassware, ovenware, glass, brick, fibrous glass products except textile fabrics, mirrors, stained, leaded and ornamented glass, glass novelties and other articles made from glass. This industry includes establishments primarily engaged in etching or painting glass or glassware.

Abrasive Manufacturers – Establishments primarily engaged in manufacturing abrasive grinding wheels of emery, carborundum and other natural or artificial materials, abrasive sticks, stones, bricks, paper and cloths and buffing and polishing wheels. This industry includes the manufacture of primary abrasive materials such as fused alumina and silicon carbide.

Other Non-Metallic Mineral Products Industries – Establishments primarily engaged in manufacturing miscellaneous non-metallic mineral products not elsewhere classified, such as mica products, expanded vermiculite, expanded perlite and roofing granules.

SECTION O

INVESTMENT

SECTION O

INVESTMENT

O- 1. **Public and Private Investment, Newfoundland and Labrador, 1949 to 1969**

Source: D.B.S. **Public and Private Investment in Canada, Outlook and Regional Estimates**, 61-205, 1949 to 1967; D.B.S. **Public and Private Investment in Canada, Outlook and MID-YEAR REVIEW**, 1969, 61-206.

Definitions and Explanations:

New Capital Expenditure in Construction:

Includes gross expenditure of business and government on the construction of new physical assets or facilities (as explained below). Includes additions to and replacements, conversions and major alterations of existing physical assets or facilities where structural change has taken place. Also includes the cost of elevators, heating systems, etc., which may be considered an integral part of the building or structure. Excludes expenditures for the acquisition of previously existing assets, machinery and equipment (as defined below), as well as the value of land purchased. However, the cost of site preparation and land improvements is included.

Total Repair and Maintenance Expenditure in Construction:

Gross expenditures on repairs and minor alterations. In general, these expenditures are the costs incurred in the repair and maintenance of existing assets or facilities and do not include major alterations or additions, or the replacement of assets which are normally charged to capital account. Routine maintenance costs, such as char service, oiling or cleaning machinery, sanding and snow removal are not included.

Total New Capital Expenditure in Machinery and Equipment:

Includes installed cost of all new machinery, motors, generators, transformers, etc., and the delivered cost of movable equipment, automobiles, trucks, office furniture and appliances, etc.; whether for own use or to rent to others. Includes imported machinery whether new or used, but excludes expenditures on used machinery and equipment purchased in Canada.

Total Repair and Maintenance Expenditure in Machinery and Equipment:

Expenditures of a similar nature to Repair and Maintenance Expenditures in Construction as defined above.

Physical Assets or Facilities:

Includes buildings; marine assets such as docks, wharves and breakwaters; hard surfaced roads and highways; water drainage and sewer systems; power transmission and distribution lines; bridges; etc.

Primary Industries:

Includes agriculture; primary fishing; logging; and mining, quarrying and oil wells.

Manufacturing:

Includes food and beverage industries (including fish product processing); tobacco products; textile and clothing industries; wood product industries; paper and allied industries (including pulp and paper mills); printing, publishing and allied industries; machinery and equipment industries; non-metallic mineral products; petroleum and coal; chemical and chemical product industries; etc.

Utilities:

Includes electric power; gas distribution; water systems; railway, water, motor and air transport; storage; and telephones including telegraph and cable systems; broadcasting; etc.

Trade, Finance, and Commercial Services:

Includes wholesale and retail trade; banks, insurance, trust, loan and real estate industries; laundries and dry cleaners; motion picture theatres; hotels; services to business management and various other recreational and personal services .

Housing, Institutional Services and Government Departments:

Includes residential housing, churches, universities, schools, hospitals, etc.

For further definition of industry components see D.B.S. **Public and Private Investment in Canada, Outlook 1969** (MID-YEAR REVIEW), 61-206, (tables 1 to 9).

[1] Preliminary Actual

[2] Revised Forecast

SECTION P

CONSTRUCTION AND HOUSING

SECTION P

CONSTRUCTION AND HOUSING

P- 1. **Principal Statistics of the Construction Industry, Newfoundland and Labrador, 1951 to 1969**
Source: D.B.S. **Construction in Canada, 64-201, 1953-55** to **1959-61,** (table 5); **1960-62** to **1967-69,** (table 7).
Definitions and Explanations:

The figures indicating the value of construction work performed include work done by the labour forces of industrial concerns, institutions, governments and individuals, in addition to that done by general contractors, trade contractors and subcontractors. Statistics shown for the value of construction include all costs incurred, directly and indirectly, by the firm paying for the erection of a new structure.

P- 2. **Value of Construction Work Performed, Newfoundland and Labrador, By Type of Structure, 1953 to 1969**
Source: D.B.S. **Construction in Canada, 64-201, 1953-55** to **1956-61,** p. 27, (table 19); **1960-61** to **1964-66,** p. 25, (table 18); **1965-67** to **1967-69,** p. 26, (table 18).
Definitions and Explanations:
New Construction:

New construction is comprised of all new work put in place, additions and major renovations, conversions and alterations where either a structural change takes place or the life of the structure is extended.

Repair Construction:

Repair construction includes minor renovations and alterations. As far as possible, snow removal, flushing and sanding of streets and general day-to-day maintainance such as char services are excluded.

P- 3. **Dwelling Starts, Completions and Under Construction, Newfoundland and Labrador, 1949 to 1969**
Source: C.M.H.C. **Canadian Housing Statistics, 1966,** p. 24, (table 8); **1968** and **1969,** p. 5, (table 5).
Definitions and Explanations:
Dwelling Unit:

A structurally separate set of living premises with a private entrance either outside the building or from a common hall, lobby, vestibule or stairway inside the building. The entrance must be one that can be used without passing through anyone else's living quarters.

Start:

A Start is recorded when the footing has been installed, that is, when the concrete has been poured for the whole of the footing around the structure.

Completion:

A Completion is the stage at which all the proposed construction work on a dwelling unit has been performed.

For multiple-dwelling structures, the definition of a Start or Completion applies to the structure rather than to the individual dwelling units therein.

Under Construction:

The number of units "Under Construction" at the end of a period takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has been made, construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported when construction commenced.

P- 6. **Occupied Dwellings Showing Period of Construction of Dwelling, Newfoundland and Labrador, Rural and Urban, 1961**
Source: D.B.S. **Census of Canada, 1961, Vol. II, Part 2, Housing Characteristics,** p. 15-1, (table 15).

P- 7. **Occupied Dwellings Showing Conditions of Dwelling, Newfoundland and Labrador, Rural and Urban, 1961**
Source: D.B.S. **Census of Canada, 1961, Vol. II, Part 2, Housing Characteristics,** p 15-1, (table 15).

Definitions and Explanations:

Condition of dwelling:

A dwelling is classified as in good condition if, regardless of age, the enumerator considered it to be sound and free from defects; in need of minor repair if it had no major structural deficiencies but presented a run-down or neglected appearance due to lack of normal maintenance; and in need of major repair if it were in a seriously run-down or neglected condition and showed one or more major structural deficiencies.

P- 8. **Occupied Dwellings By Tenure, Showing Number and Percent, Newfoundland and Labrador, Rural and Urban, 1951, 1961 and 1966**

Source: D.B.S. **Census of Canada, 1951, Vol. III, Housing and Families,** p. 6-1, (table 6); **1961, (2.2), Vol. II, Part 2, Housing Characteristics,** p. 10-1, (table 10); Data for 1966 supplied by D.B.S., Census Division, Population and Housing Section.

Definitions and Explanations:

Tenure:

A dwelling is classified as "owned" (even though mortgaged) if it belongs to some member of the household; otherwise it is classified as "rented", whether or not a specified rent is paid.

P- 9. **Occupied Dwellings By Type of Structure, Newfoundland and Labrador, Rural and Urban, 1951, 1961 and 1966**

Source: D.B.S. **Census of Canada, 1951, Vol. III, Housing and Families,** p. 8-1, (table 8); **1961, (2.2), Vol. II, Part 2, Housing Characteristics,** p. 5-1, (table 5); Data for 1966 supplied by D.B.S., Census Division, Population and Housing Section.

Definitions and Explanations:

Dwelling:

A dwelling is a structurally separate set of living quarters, with a private entrance either from outside or from a common hall or stairway inside the building. The various types of dwellings are:

Single detached: This type is commonly called a "single house". It contains only one dwelling unit which is completely separated on all sides from any other dwelling or structure.

Single attached: This category includes dwelling units separated by a common wall extended from ground to roof. Single attached dwellings in structures consisting of only two dwelling units are classified as single attached (double). All other single attached dwellings whether in rows of three or more dwellings or simply a unit adjoining a store or other non-residential structure, are classified as single attached (other).

Apartments and flats: These units include not only dwellings contained in structures originally designed, or structurally converted to provide more than one dwelling unit, but also all other dwellings of the apartment or flat-type which may be contained within a residential structure or a non-residential structure.

P-10. **Single Detached Owner-Occupied Rural and Urban Dwellings, Newfoundland and Labrador, By Value, 1961**

Source: D.B.S. **Census of Canada, 1961, (2.2), Vol. II, Part 2, Housing Characteristics,** p. 60-1, (table 60).

Definitions and Explanations:

Value:

Figures for "value" relate to single-detached, owner-occupied, non-farm dwellings only, and are based on the amount expected if the dwelling were sold to a willing buyer. The "median" value has been based on the number of occupied dwellings with "stated" value.

SECTION Q

TRANSPORTATION

SECTION Q

TRANSPORTATION

Q- 1. **Vessel Arrivals and Departures in Coastwise Shipping, Newfoundland and Labrador, By Principal Port, 1950 to 1968**

Source: D.B.S. **Shipping Report, 54-204, 1950** and **1951** (table 2); **1952,** (table 15); **1953** to **1955,** (table 13); **1956** to **1967,** (table 14); Data for **1968** supplied by D.B.S., Transportation and Public Utilities Division.

Definitions and Explanations:

Shipping statistics are compiled from reports completed by operators or agents of vessels arriving and departing Canadian Ports. All vessels are required to submit reports excepting naval or fishing vessels, and craft of less than fifteen registered net tons.

A vessel is classed as being in coastwise service if (1) it is of Canadian or British Commonwealth registry, sails between two Canadian ports, and loads or unloads no foreign freight; or (2) it is of foreign registry, but is granted a waiver to engage in coastwise shipping.

A vessel's arrival and departure at ports on a voyage could vary between foreign or coastwise depending on which definition of service is applicable. Because of the variety that is possible in vessel movements, the number of arrivals and departures in either international seaborne or coastwise shipping need not necessarily be the same. In addition, beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 can cause a disparity in the total number arrived and departed. Vessels entering a port at the end of a year and clearing it the following January would only be counted as an arrival or departure for that year when the movement occurred.

Q- 2. **Number of Vessels Arrived and Departed in International Seabourne Shipping, Newfoundland and Labrador, By Principal Port, 1950 to 1968**

Source: D.B.S. **Shipping Report, 54-203, 1950** and **1951,** (table 2); **1952** to **1956,** (table 7); **1957** to **1967,** (table 8); Data for 1968 supplied by D.B.S., Transportation and Public Utilities Division.

Definitions and Explanations:

See Q-1. The term "International Seaborne Shipping" is used for vessels classed as being in foreign service, that is when (1) the vessel arrives from or departs for a foreign port; or (2) cargo is loaded for or unloaded from a foreign port; or (3) the registry of the vessel is other than Canadian or British Commonwealth (even though the vessel may have sailed between two Canadian ports but without a waiver).

Q- 3. **Cargoes Handled in Coastwise Shipping, Newfoundland and Labrador, By Principal Port, 1952 to 1968**

Source: D.B.S. **Shipping Report,** 54-204, **1952** to **1955,** (table 10); **1956** to **1967,** (table 11); Data for **1968** supplied by D.B.S., Transportation and Public Utilities Division.

Definitions and Explanations:

See Q-1.

Q- 4. **Cargoes Loaded For Foreign Countries and Cargoes Unloaded From Foreign Countries, Newfoundland and Labrador, By Principal Port, 1950 to 1968**

Source: D.B.S. **Shipping Report,** 54-203, **1950** and **1951,** (table 7); **1952** to **1956,** (table 5); **1957** to **1967,** (table 6); Data for 1968 supplied by D.B.S., Transportation and Public Utilities Division.

Definitions and Explanations:

See Q-1 and Q-2.

Q- 5. **Revenue Freight Loaded and Unloaded by Railways, Newfoundland and Labrador, 1950 to 1968**

Source: D.B.S. **Railway Freight Traffic, 52-205, 1950,** pp. 10 and 11; **1951** and **1952,** pp. 8 and 9; **1953** to **1962,** (table 2); **1963** to **1968,** (table 3).

Q- 6. **Highway and Rural Road Mileage, Newfoundland and Labrador, 1950 to 1968**

Source: D.B.S. **Canada Year Book, 1952** to **1965,** Transportation Section, (table 1); D.B.S. **Road And Street Mileage And Expenditure,** 53-201, **1964** to **1967,** (table 2), Data for **1950** and 1968 supplied by D.B.S., Transportation and Public Utilities Division.

Q- 7. **Urban Street Mileage, Newfoundland and Labrador, 1955 to 1968**

Source: D.B.S. **Road and Street Mileage and Expenditure,** 53-201, **1955,** (table 2); **1956** and **1957,** (table 6); **1958** to **1962,** (table 9); **1963,** (table 8); **1964** to **1967,** (table 3); Data for **1968** supplied by D.B.S., Transportation and Public Utilities Division.

Definitions and Explanations:

Rigid pavement is composed of concrete surfaced streets and bituminous surfaced concrete base streets.

Flexible pavement is composed of asphalt surfaced streets.

Q- 8. **Number of Motor Vehicles Registered, Newfoundland and Labrador, By Type, 1949 to 1968**

Source: D.B.S. **The Motor Vehicle, Part III, Registrations,** 53-219, **1960** to **1968;** D.B.S. **The Motor Vehicle,** 53-203, **1949, 1950, 1955, 1960** and **1965,** (table 2); **1951,** (table 1); data for all other years contained in table 3.

Definitions and Explanations:

Passenger Automobiles include taxicabs, rented cars, etc. as well as privately owned automobiles. Commercial vehicles include trucks, buses, and other motor vehicles such as farm tractors, etc.

Q- 9. **Passengers Carried By Air Canada, Newfoundland and Labrador, 1949 to 1968**

Source: Air Canada District Sales Office, St. John's, Newfoundland.

Q-10. **Air Freight Carried by Air Canada, Newfoundland and Labrador, 1950 to 1968**

Source: Air Canada District Sales Office, St. John's, Newfoundland.

Q-11. **Aircraft Landing Areas, Newfoundland and Labrador, By Type, 1950 to 1969**

Source: Canadian Aerodrome Directory, Surveys and Mapping Branch, Department of Mines and Technical Surveys, Ottawa.

---

[1] Includes Curling and Humbermouth for the years 1957 to 1964; in 1965 these locations were considered part of Corner Brook, and intra-port activity was not tabulated.

[2] 1957 onwards includes coastal traffic at non-customs ports.

[3] 1959 onwards includes full coverage of CN Newfoundland Coastal Services.

1967	1,347	941

SECTION S

ELECTRIC POWER

SECTION S

ELECTRIC POWER

General Note:

In the following tables, wherever reference is made to D.B.S. "Electric Power Statistics", (57-202), it should be noted that prior to 1956 this publication was entitled "Central Electric Stations".

Most of the following tables only go back as far as 1956 because in that year D.B.S. undertook a reclassification of power producers. The earlier statistical series were limited to organizations selling power to the public and these organizations were called Central Electric Stations. Most were electric utilities although a few were industrial establishments which sold a limited amount of power to their own employees or to a nearby municipality.

The major difference between the old series and the new is that several blocks of power previously treated as sales by a central electric station to an industrial customer are now treated as energy produced by an industrial establishment for its own use. Organizations whose primary function is to sell the electricity they generate or purchase are classified as utilities. Those generating power primarily for use in their own industrial operations, principally manufacturing or mining (e.g. Price Newfoundland Limited—see Table S-1) are classified as industrial establishments.

All energy sales and transfers between power producers have been allowed for in the statistics so that duplications are excluded.

S- 1. **Power Generated, Newfoundland and Labrador, By Producer, 1950 to 1968**

Source: Data supplied by Newfoundland and Labrador Power Commission.

Definitions and Explanations:

The total power generated as shown in this table does not coincide with the total generation shown in Table S-2. The reason is that Table S-1 does not show all energy generated. This table was derived from statistics supplied by the Board of Commissioners of Public Utilities. Their data applies to utilities which sell electric power publicly, since other sales do not have to be regulated by The Board. The data on generation by Price Newfoundand Limited was supplied by them to the Newfoundland and Labrador Power Commission. Electric power generated by industrial establishments for their own use would not be recorded in this table.

S- 2. **Supply and Disposal of Electric Energy, Newfoundland and Labrador, 1952 to 1968**

Source: D.B.S. **Electric Power Statistics,** 57-202, **1965,** p. 10, (table 2), p. 54, (table 17), p. 12, (table 3); **1966,** p. 10, (table 2), p. 12, (table 3); **1967,** p. 10, (table 2), p. 12, (table 3); Data for 1964 to 1968 supplied by D.B.S., Energy and Minerals Section, Manufacturing and Primary Industries Division.

The industrial consumption of electric energy is based, in part, on data collected by the Manufacturing and Primary Industries Division of the Dominion Bureau of Statistics in the Census of Manufacturers reports. Because these reports are concerned primarily with consumers rather than producers of electric energy and are completed on the basis of different concepts and for different reporting periods, considerable difficulty is encountered in reconciling the two sets of data. For example, energy transferred between two establishments within the same organization may be reported under the purchases in "Census of Manufacturers" reports, but as produced for own use in "Electric Power Statistics" reports.

Consumption of electric power for certain manufacturing groups is confidential because of the limited number of firms in any one group. As a result only the total manufacturing consumption is shown.

S- 3. **Electric Power Survey of Capability and Load, Newfoundland and Labrador, 1950 to 1968**

Source: D.B.S. **Electric Power Statistics Annual Electric Power Survey of Capability and Load,** 57-204, **1959,** p. 25, (table II), p. 26, (table III), p. 27, (table IV), p. 28, (table V); **1961,** p. 39, (table 2), p. 40, (table 3), p. 41, (table 4), p. 42, (table 5); **1965,** p. 40, (table 2), p. 41, (table 3) p. 42, (table 4), p. 43, (table 5); **1968,** p. 42, (table 2), p. 43, (table 3), p. 44, (table 4), p. 45, (table 5).

"Net Generating Capability Within Province" is the maximum net kilowatt output (after station service) available from the generating facilities of the Utility, System or Industrial Establishment with all equipment available at the time of the annual Firm Power Peak Load, determined as the average kilowatt output for one hour with no allowance for outages of generating units.

"Firm Power Peak Load Within Province" is the demand for power from firms and individuals that operate within the boundaries of the province.

"Firm Energy Requirement" is the energy required to meet firm obligations, or for use in own industrial plant other than secondary energy.

"Gross Capability" is the same as net generating capability plus the receipts of power from other provinces.

"Firm Power Peak Load on Province" includes demand for firm power by other provinces, as well as the load within, noted in "Firm Power Peak Load Within the Province".

"Indicated Reserve" is the net capability less indicated firm power peak load within the province or gross capability less firm power peak load on the province.

---

[1] Not all producers of electric power are shown in this table because data for some companies is not available. The total shown; therefore, is not the total power generated in Newfoundland and Labrador.

[2] Includes power generated formerly by Newfoundland Light & Power, United Towns Electric, Union Electric, and West Coast Power. These companies are now amalgamated under Newfoundland Light and Power Co. Ltd.

[3] These are not annual figures: The data for 1950 includes generation of power from Oct. 1, 1949 to Sept. 30, 1950.
The data for 1951 includes generation of power from Oct. 1, 1950 to Sept. 30, 1951.
The data for 1952 includes generation of power from Oct. 1, 1951 to Sept. 30, 1952.
The data for 1953 includes generation of power from Oct. 1, 1952 to Sept. 30, 1953.

TABLE S-2

SUPPLY AND DISPOSAL OF ELECTRIC ENERGY, NEWFOUNDLAND AND LABRADOR,

1952 TO 1968

(Thousands of Killowatt-hours)

Supply of Energy	1952	1953	1954	1955	1956	1957	1958	1959

---

[1] Does not include inter-utility transactions.

[2] Excludes sales to industrial establishments with generating and/or distributing facilities.

[3] Prior to 1963 power deliveries were not distinguished between power-firm, and power-secondary. From 1949 to 1955 deliveries of power were distinguished as deliveries to "small", "large", and "municipal" stations. From 1956 to 1962, power deliveries were distinguished as deliveries "Excluding deliveries to electric boilers", and "Deliveries to electric boilers". Only subsequent to 1963 have power deliveries been distinguished as power-firm, and power-secondary.

TABLE S-6

SELECTED STATISTICS OF ELECTRIC POWER SOLD TO DOMESTIC AND FARM CONSUMERS. NEWFOUNDLAND AND LABRADOR, 1949 TO 1968

Year	Customers	Kilowatt Hours Sold	Kilowatt Hours Per Customer	Revenue Received	Average Annual Bill	Revenue Per Kilowatt Hour

SECTION T

TRADE AND SERVICES

SECTION T

TRADE AND SERVICES

T- 1. **Retail Trade, Newfoundland and Labrador, By Month, 1961 to 1969**

Source: Data supplied by D.B.S., Retail Trade Section, Merchandising and Services Division. The 1961-66 data has been revised to a new (1966) Census base; revised data for 1966-69 will be available in the near future.

T- 2. **Retail Trade, Newfoundland and Labrador, By Business Group, 1951, 1961 and 1966**

Source: D.B.S. **Census of Canada, 1961,** 97-501, (table 1); **1966,** 97-602, (table 1); Data for 1951 supplied by D.B.S., Retail Trade Section, Merchandising and Services Division.

Definitions and Explanations:

General Note on the 1966 Census Tables:

New kinds of business introduced for the first time in the 1966 Census are "Home and auto supply stores", and "Grocery, confectionery and sundries stores". The introduction of home and auto supply stores recognizes the diversification by many retailers previously classed as accessories, tires and battery stores into additional commodity lines not normally associated with the automatic trade.

To isolate small neighbourhood stores whose grocery content has been largely diluted by a variety of unrelated merchandise, the new classification of "Grocery, confectionery and sundries" was established.

Another significant change from previous censuses has been made in the "Department Store" classification. Catalogue sales data, formerly included with department store sales data, have been allocated to the "General merchandise store" classification. In addition, non-department store locations of department store organizations were reclassified to their appropriate categories.

T- 3. **Selected Statistics of Retail Trade, Newfoundland and Labrador, By Business Group and Selected Trade, 1966**

Source: D.B.S. **Census of Canada, 1966,** 97-602, (table 1).

T- 4. **Retail Trade, Census Divisions, Newfoundland and Labrador, By Business Group and Selected Trade. 1966**

Source: D.B.S. **Census of Canada, 1966,** 97-603, (table 5).

T- 5. **Retail Trade, St. John's, By Business Group and Selected Trade, 1966**

Source: D.B.S. **Census of Canada, 1966,** 97-603, (table 7).

Definitions and Explanations:

This table refers only to the city proper. For data on the metropolitan area of St. John's, see Table T-6.

T- 6. **Selected Statistics of Retail Trade, St. John's Metropolitan Area, By Business Group and Selected Trade, 1966**

Source: D.B.S. **Census of Canada, 1966,** 97-603, (table 2).

Definitions and Explanations:

This table refers to the St. John's metropolitan area. For data on St. John's city proper, see Table T-5.

T- 7. **Selected Statistics of Retail Trade For Incorporated Places of 1,000 Population and Over, Newfoundland and Labrador, By Census Division, 1966**

Source: D.B.S. **Census of Canada, 1966,** 97-603, (table 4).

T- 8. **Gasoline and Diesel Oil Sales For Motive Purposes, Newfoundland and Labrador, 1949 to 1968**

Source: D.B.S. **The Motor Vehicle, Part II, Motive Fuel Sales,** 53-218, **1960 to 1968,** (tables 1, 2 and 6); Data for 1949 to 1956 suplied by D.B.S., Transportation Section, Transportation and Public Utilities Division.

T- 9. **Number and Value of New Motor Vehicle Sales, Newfoundland and Labrador, By Type, 1952 to 1968**

Source: D.B.S. **New Motor Vehicle Sales,** 63-208,**1952 to 1956,** p. V. 8, (table 3); **1957,** p. 8, (table 1); **1958 to 1966,** pp. 9 and 10, (tables 2 and 3); **1967,** pp. 8 and 9, (tables 3 and 4); **1968,** pp. 12 and 14, (tables 3 and 4).

Definitions and Explanations:

"Commercial Vehicles" refer solely to "Trucks" and "Buses". All other vehicles, even though they may be carrying passengers (i.e. taxis and local delivery services, etc.), are classified as passenger vehicles.

T-10. **Wholesale Trade, Newfoundland and Labrador, By Type of Business, 1951 and 1961**

Source: Data supplied by D.B.S., Wholesale Trade Section, Merchandising and Services Division.

Definitions and Explanations:

It should be noted in this table that the sales from 1951 to 1961 are not comparable since so much of the data for 1951 is not available.

T-11. **Number and Receipts of Service Establishments, Newfoundland and Labrador, By Business Group, 1951, 1961 and 1966**

Source: D.B.S. **Census of Canada, 1961,** 97-517, (table 30); **1966,** 97-643, (table 5); Miscellaneous data for 1961 supplied by D.B.S., Retail Trade Section, Merchandising and Services Division.

T-12. **Number and Receipts of Service Establishments, Census Divisions, Newfoundland and Labrador, By Kind of Business Group and Selected Trade, 1966**

Source: D.B.S. **Census of Canada, 1966,** 97-643, (table 5).

T-13. **Number and Receipts of Service Establishments, St. John's, By Business Group and Selected Trade, 1966**

Source: D.B.S. **Census of Canada, 1966,** 97-643, (table 6).

T-14. **Selected Statistics of Service Establishments For Incorporated Places of 1,000 Population and Over, Newfoundland and Labrador, By Census Division, 1966**

Source: D.B.S. **Census of Canada, 1966,** 97-643, (table 14).

T-15. **Estimated Restaurant Receipts, Newfoundland and Labrador, By Month, 1961 to 1969**

Source: D.B.S. **Restaurant Statistics,** 63-011, (monthly), **June 1967,** pp. 3 to 9; **July 1968,** pp. 4 to 6; **August 1968** to **October 1969,** (individual monthly reports).

Definitions and Explanations:

Prior to the June 1967 publication of D.B.S. Catalogue No. 63-011 these statistics were published in the D.B.S. report **Retail Trade,** Catalogue No. 63-005. The term "Sales" rather than "Receipts" was used in the **Retail Trade** (monthly bulletin) to denote volume of business. As a result of a revision of the Standard Industrial Classification in 1960, restaurants, caterers, cocktail lounges and taverns were transferred from the retail to the service sector of the industry.

The estimates found in this table are for restaurants only and comprise the following six trades of the 1961 census:

(1) Eating places;
(2) Eating places with alcoholic beverages;
(3) Eating places with other merchandise;
(4) Fish and chip shops;
(5) Eating places with motel and/or cabins;
(6) Eating places with alcoholic beverages and with motel and/or cabins.

1968	74,295[4]	54,073	23,036

---

[1] Net sales are gross sales less gasoline exempt from tax or on which tax was refunded.

[2] Includes exports.

[3] Gross sales of motor and tractor grades only until January 1, 1956 when sales of marked gasoline were included.

[4] Excludes aviation and aviation turbo fuels.

TOURISM

SECTION U

TOURISM

U- 1. **Number of Tourist Establishments, Newfoundland and Labrador, 1950 to 1968**

Source: Data supplied by Tourist Development Office, Department of Economic Development, Government of Newfoundland and Labrador.

Definitions and Explanations:

This table includes all licenced tourist establishments. Included are both establishments that are open all year and establishments that are open only part of the year.

U- 2. **Expenditure and Number of Residents and Non-Residents Accommodated at Tourist Establishments, Newfoundland and Labrador, 1960 to 1968**

Source: Data supplied by Tourist Development Office, Department of Economic Development, Government of Newfoundland and Labrador.

Definitions and Explanations:

The amount spent for accommodation and meals, the amount spent for liquor, and the number of residents and non-residents accommodated refer to licenced tourist establishments only.

U- 3. **Number and Gross Earnings of Employees in Tourist Establishments, Newfoundland and Labrador, 1967 to 1968**

Source: Data supplied by the Tourist Development Office, Department of Economic Development, Government of Newfoundland and Labrador.

Definitions and Explanations:

The number of employees in the tourist establishments, and the gross earnings of these employees cannot be validly compared between successive years.

These figures are compiled by inspectors from the Tourist Development Office. However, the data is not compiled at the same time each year, and since variations in the number of employees and their gross earnings occur according to the season of the year, differences in the data may also be due to the fact that the reports on the number of employees and their gross earnings were made at different times of the year.

TABLE U-1

V- 3. **Provincial Government Employees and Gross Payrolls, Newfoundland and Labrador, 1960 to 1969**
Source: D.B.S. **Provincial Government Employment,** 72-007, (Quarterly), **1960,** (tables 1 and 2); **1961 to 1969,** (table 3).

Definitions and Explanations:

Provincial Government Employees and their Gross Payrolls consists of employees in "Departmental Services", "Provincial Institutions of Higher Education", "Provincial Government Enterprises", and "Workmen's Compensation Boards".

"Departmental Services" are also known as General Fund activities. This comprises the activities carried on by provincial governments as reflected in their Estimates and in addition, expenditures on employment by special or administrative funds.

"Provincial Institutions of Higher Education" are educational institutions at the university level which are under the control of the provincial government, but which are not administered under departmental authority. In Newfoundland this would only include Memorial University of Newfoundland.

"Provincial Government Enterprises" are self reporting administrative bodies established by government to produce goods and services for sale to governments or others at a price to the users designed to compensate largely or wholly for the costs or to yield a profit. For the latest full list of Provincial Government Enterprises see D.B.S. **Provincial Government Employment April-June,** 72-007, p. 23.

"Gross Payrolls" are the payrolls of all persons paid for work done during the month whether they were still employed at the end of the month or not. They include retroactive pay, salary adjustments and overtime payments.

Comparability Between Numbers and Earnings:

The user of these statistics is advised to avoid making direct comparison between the numbers of employees reported and the payrolls reported. The reason is that numbers relate to the last day of the month wherever possible and otherwise to the final pay period of the month. Since in certain categories, especially casual employment, considerable fluctuations in numbers employed occur during a month, a comparison between the payrolls of all persons employed during the month and the number still employed at the end of the month would not be valid in many cases.

[1] Prosecutions for Traffic Offences.

[2] Excludes accidents under $100.

Note: On January 1, 1962 D.B.S. implemented a new method of reporting police statistics; therefore, the figures shown for 1950 to 1961 are not comparable with those for 1962 to 1967.
